Aqara

Manufacturer: AQARA

Referention number: DNXXGKLSERMMKN

Information:

Aqara Cube T1 Pro is a new, improved version of the iconic Cube controller, which is even easier to use and more versatile. Thanks to its six clear sides, you can assign different scenes and devices without having to memorise complicated gestures. It supports Zigbee 3.0 as well as HomeKit, Alexa, IFTTT and Matter, offering broad compatibility with smart home devices. It allows you to rotate, shake and control various actions, as well as OTA updates. Ultra-low power consumption provides up to 2 years of operation on a single battery.

Product features

Height	45 mm
Width	45 mm
Depth	45 mm
Connectivity technology	Wireless
Operating frequency	2405 MHz
Battery operated	Yes
Humidity measurement range	0 - 95%
Voice control	Yes
Operating temperature (T-T)	-10 - 50 °C
ZigBee	Yes
Wi-Fi	No
Control type	Touch
Ethernet LAN	No
Product colour	White
Virtual assistant	Amazon Alexa
Built-in display	No

Full product description

New and improved version of the Cube controller

Cube T1 Pro combines all the advantages of the iconic Cube controller, while being even easier to use. You do not need to remember all 7 actions: now you can use each side to control different scenes or devices. **Each side has clear dice-like indicators**, so it will be obvious which side controls which device. In addition to the fact that **the product is more environmentally friendly**, ultra-low power consumption will let you forget about replacing the battery for up to 2 years.

Key features of the Aqara Cube T1 Pro

- Zigbee 3.0 protocol
- Wide compatibility
- More actions in Scene mode
- Action mode from the Classic Cube
- Up to 2 years of battery life
- Rotate to control or operate
- OTA update support

Support for HomeKit and Alexa

Broader compatibility creates endless possibilities. **Magic Cube T1 Pro** is much more versatile: it now supports **HomeKit**, **Alexa**, **IFTTT** and **Matter**. Now you can use each of its six sides to control third-party devices, for example turn it to side 5 to trigger an Alexa routine that controls the lights, or turn it to side 2 to switch on a HomeKit-compatible thermostat.

Find more joy in switching scenes

Roll the dice! You do not need to remember all the actions, now **Magic Cube T1 Pro** has clear indicators resembling those on a **traditional die** for each side and you can use each of them to control different scenes or devices. Besides, actions such as rotating, shaking or holding from different sides create more possibilities.

Turn the cube and control different lights or blinds!

For example, turn the Magic Cube onto side 2 and rotate the cube to adjust the brightness of the ceiling lamp, and do the same after turning it onto side 3 to adjust the opening percentage of the blind!

Use different sides of the cube to control the camera

The perfect pair: switch Camera Hub G3 from face recognition mode to gesture recognition mode, enable privacy protection or set it in different positions by rotating the cube. A dedicated hub is not needed!

One action is enough to take full control of your blinds

Shake the cube once to open the blinds, shake it again to stop the blinds in the desired position and shake it once more if you want to close them: you do not need to perform three different actions!

Compact and high-quality design with a built-in high-accuracy, low-power sensor
