Full product description

Easy to use but powerful Aqara E1 smart curtain controller

Simply hang the **Aqara E1** Curtain Controller on the rail and start enjoying automatic control of your existing curtains based on weather, time or other Aqara devices running.

Key features of the Aqara Curtain Driver E1

- You can forget about charging for up to a year
- Supports virtually any type of curtain rod
- Built-in light sensor
- Zigbee 3.0 support
- Easy installation
- Maximum load 12 kg
- Support for HomeKit and other ecosystems
- Automation by time, weather and more

Wide compatibility

The **E1 roller shutter controller** is compatible with a wide range of smart home ecosystems and voice assistants. **Apple HomeKit, Amazon Alexa, Google Assistant, IFTTT and others** are supported. Matter support will be available via an OTA update of the Aqara hubs after the official release of the Matter specification.

Easy installation and use

No tools are needed. Simply mount **the Aqara E1 blind controller** on your existing curtain rods and hide it behind the curtain, then follow the directions and complete the setup in the **Aqara Home** app.

Durable rechargeable battery

State-of-the-art power-saving technologies and a huge **6,000 mAh** battery guarantee up to a year of use time. The most versatile **Type-C port** is used for charging and even continuously powering the device.

Support for popular types of curtain rods

The **E1 roller shutter motor** supports virtually any type of curtain rod. The Rod version fits rod curtain rods, while the Track version will be ideal for rail curtain rods (U-Rail and I-Rail).

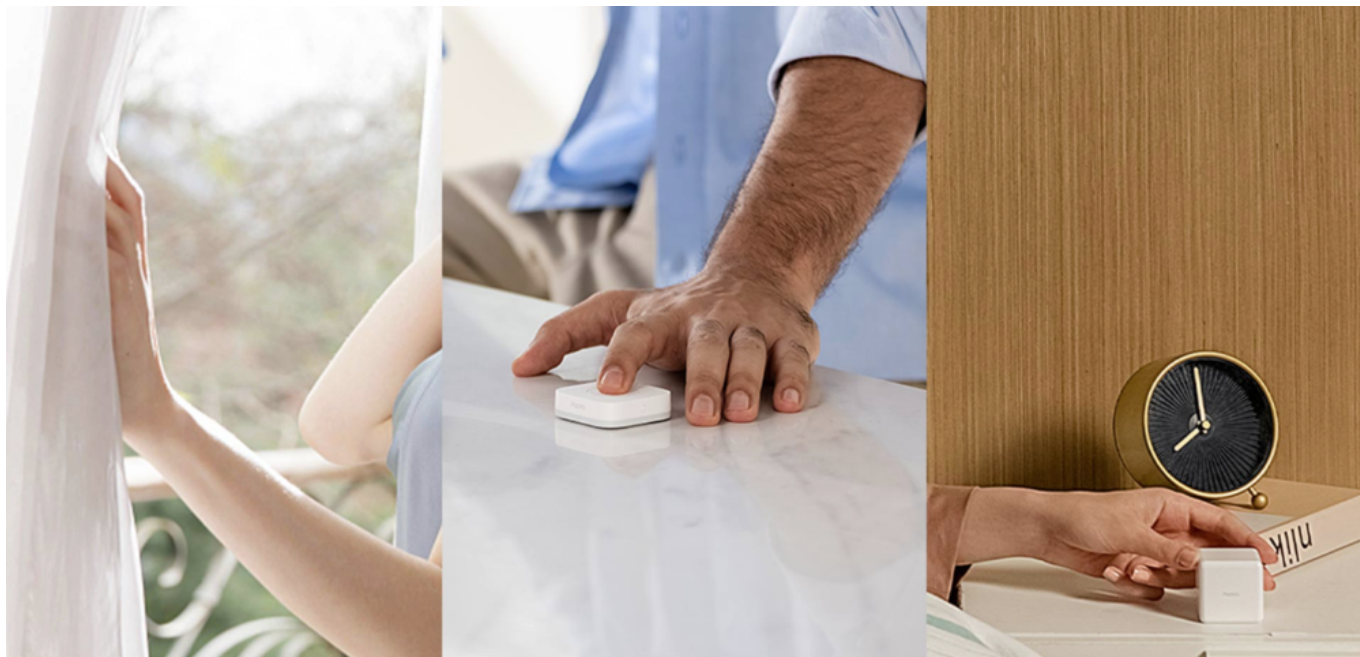

Voice control

Apple's Siri, Amazon Alexa and Google Assistant are supported. Choose the most popular voice assistant you want to easily control the **Aqara E1** controller with a voice command.

One-touch startup

The **E1 roller shutter motor** can be started with just one touch: pulling the curtain lightly, pressing the **Aqara mini switch**, or turning **the Aqara cube** once.

Curtains will open automatically depending on time, weather, lighting conditions or other Aqara devices

In the morning, the curtains will slowly open just before you wake up to make your mornings more pleasant. When the sun is too bright, the curtains will partially close. Finally, the curtains will open just before sunset, so you can enjoy the view. Everything can be configured **in the Automation section of the Aqara Home app**.

The curtains will close when you go to bed

Before bedtime, the Aqara motion sensor placed at the top of the bed will cause the E1 curtain controller to close the curtains, so you can sleep more comfortably and have pleasant dreams.

Bedroom curtains close automatically when you take a shower

Aqara's temperature and humidity sensor will cause the E1 curtain controller to close the bedroom curtains when the humidity level in the bathroom rises, and your privacy will be protected when you leave the bathroom.

Configuration via the Aqara Home app

The Aqara Home app has a powerful scheduling feature, including days of the week, holidays, monthly and yearly repeats, geofencing, and sunrise and sunset.
