Full product description

Comfort and efficiency anywhere

Tourist gas stove is the ideal solution for people who appreciate the convenience of cooking outdoors. Perfect for camping, camping, or even on a construction site, it will perform well in all conditions. Thanks to **its dual-function design**, powered by both 225g cartridges and a gas cylinder, you can use it in a variety of places. **The high heating power of 2800 watts** ensures fast and efficient food preparation.

Safety and ease of use

The gas stove is equipped with a **secure cartridge mounting system**, which allows for quick and hassle-free gas changes. Thanks to the **automatic piezo ignition**, starting the device is quick and safe. Simply turn the regulator knob to generate a spark and start the flame. In addition, **the flame adjustment** allows you to fine-tune the power to suit your needs.

Ideal for different types of dishes

The 7 cm gas burner provides optimal cooking conditions, and the ability to use pots from 11 to 30 cm in diameter makes it extremely versatile. Whether you're cooking in a small cup or a large pot, **the travel cooker** will easily meet your requirements.

Compact and functional

The stove is designed for easy transportation and storage. Thanks to its compact size (34 x 27,5 x 8,5 cm) and the practical carrying case included, you can take it anywhere. It is a device that does not take up much space, and offers full functionality when needed.

A set that provides convenience

The set includes not only a gas stove, but also a handy carrying case for easy transportation. All the components are ready to use as soon as they are removed from the package. With this stove, every trip becomes more comfortable, and cooking outdoors becomes easier than ever before.
