Price: **389.00 zł** gross / 316.26 zł net

Manufacturer: AQARA

Referention number: DNXXGGOJSHRMMOK

Information:

Aqara Display Switch V1 is a smart switch combining elegant design with advanced functionality. Equipped with a clear 2.08-inch LCD screen, it allows you to personalise button labels, icons and colours, making home automation easier to use. The four buttons offer wired control, wireless control and scene triggering. Thanks to Zigbee and Matter over Bridge, it integrates with Apple Home, Alexa, Google Home, SmartThings, Home Assistant and Homey, while the repeater function strengthens network stability. The built-in presence sensor automatically activates the screen, and energy consumption monitoring helps reduce bills. The fingerprint-resistant glass panel emphasises the modern look and durability.

AC input voltage	200 V
Built-in speaker(s)	No
Power source type	AC
Product colour	White
Virtual assistant	Amazon Alexa / Google Home / Apple HomeKit
Built-in display	Yes
Product weight	205 g

Full product description

Aqara Display Switch V1 smart switch - functionality and style in one

Aqara Display Switch V1 is a device that changes the approach to everyday smart home management. Thanks to the clear LCD screen, full customisation options and versatile control, the switch becomes an invaluable element of a modern interior. Integration with popular ecosystems, energy monitoring function and minimalist design make it a choice for those who value convenience, savings and aesthetics. Choose a solution that combines functionality with elegance and enhances the comfort of your everyday life.

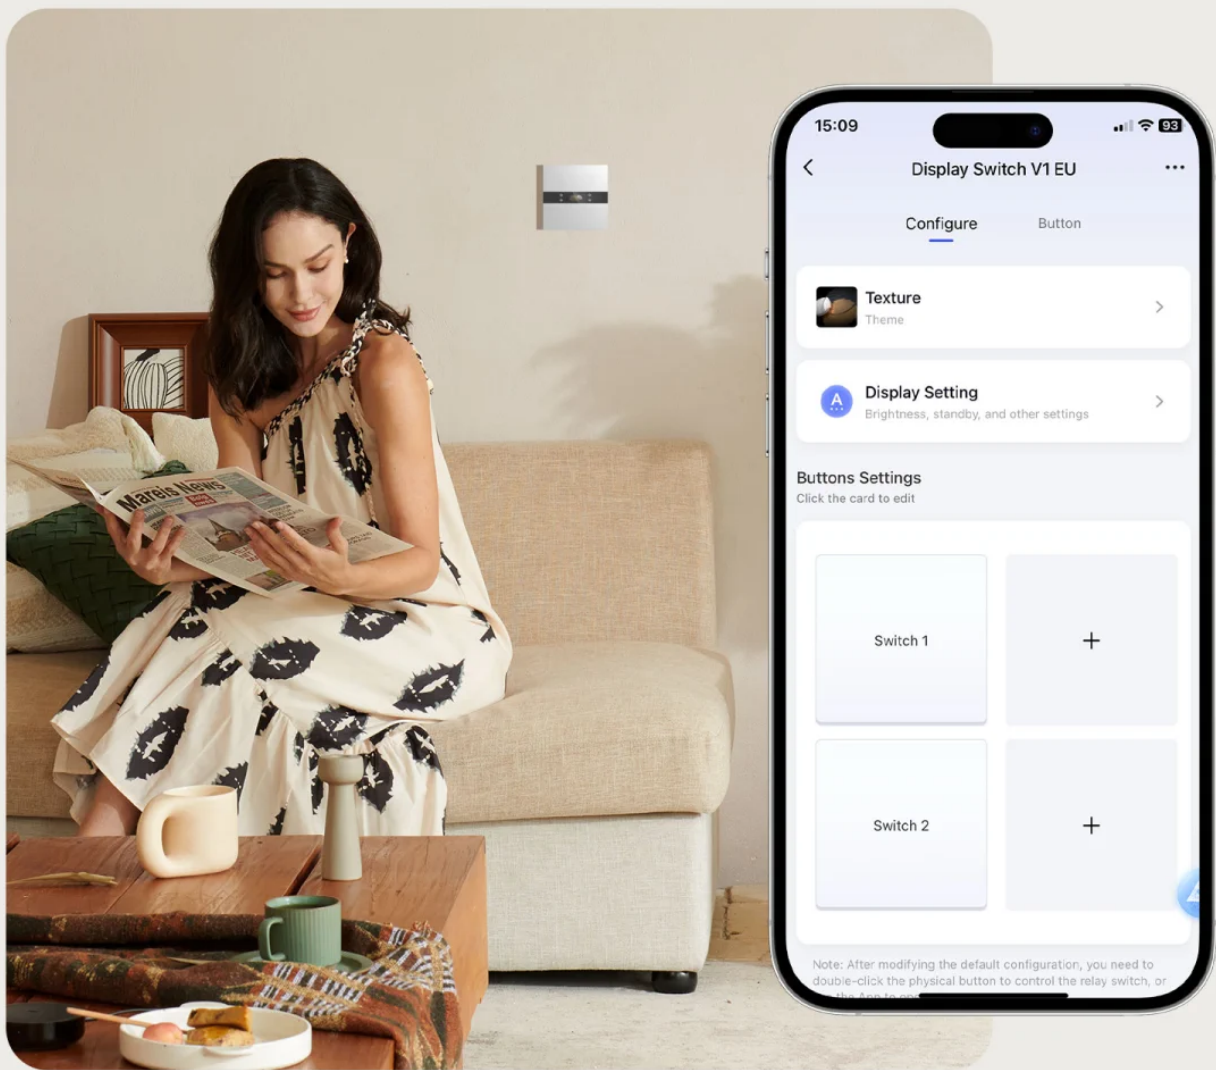

Clear LCD screen for full control

The Aqara Display Switch V1 is equipped with a clear 2.08-inch LCD screen that allows personalised text, icons and colours to be displayed. Each of the four buttons can be precisely labelled, making it easier to recognise their functions. With the ability to adjust the size and style of the text, the switch becomes fully intuitive and tailored to your needs, allowing easy management even in complex home automation systems.

Versatile control options

Aqara Display Switch V1 combines a classic wired switch with modern wireless functions. The two buttons on the left can control electrical circuits, while the two buttons on the right act as wireless switches. What is more, all four buttons can be configured as scene triggers, enabling full control over a variety of scenarios in your smart home.

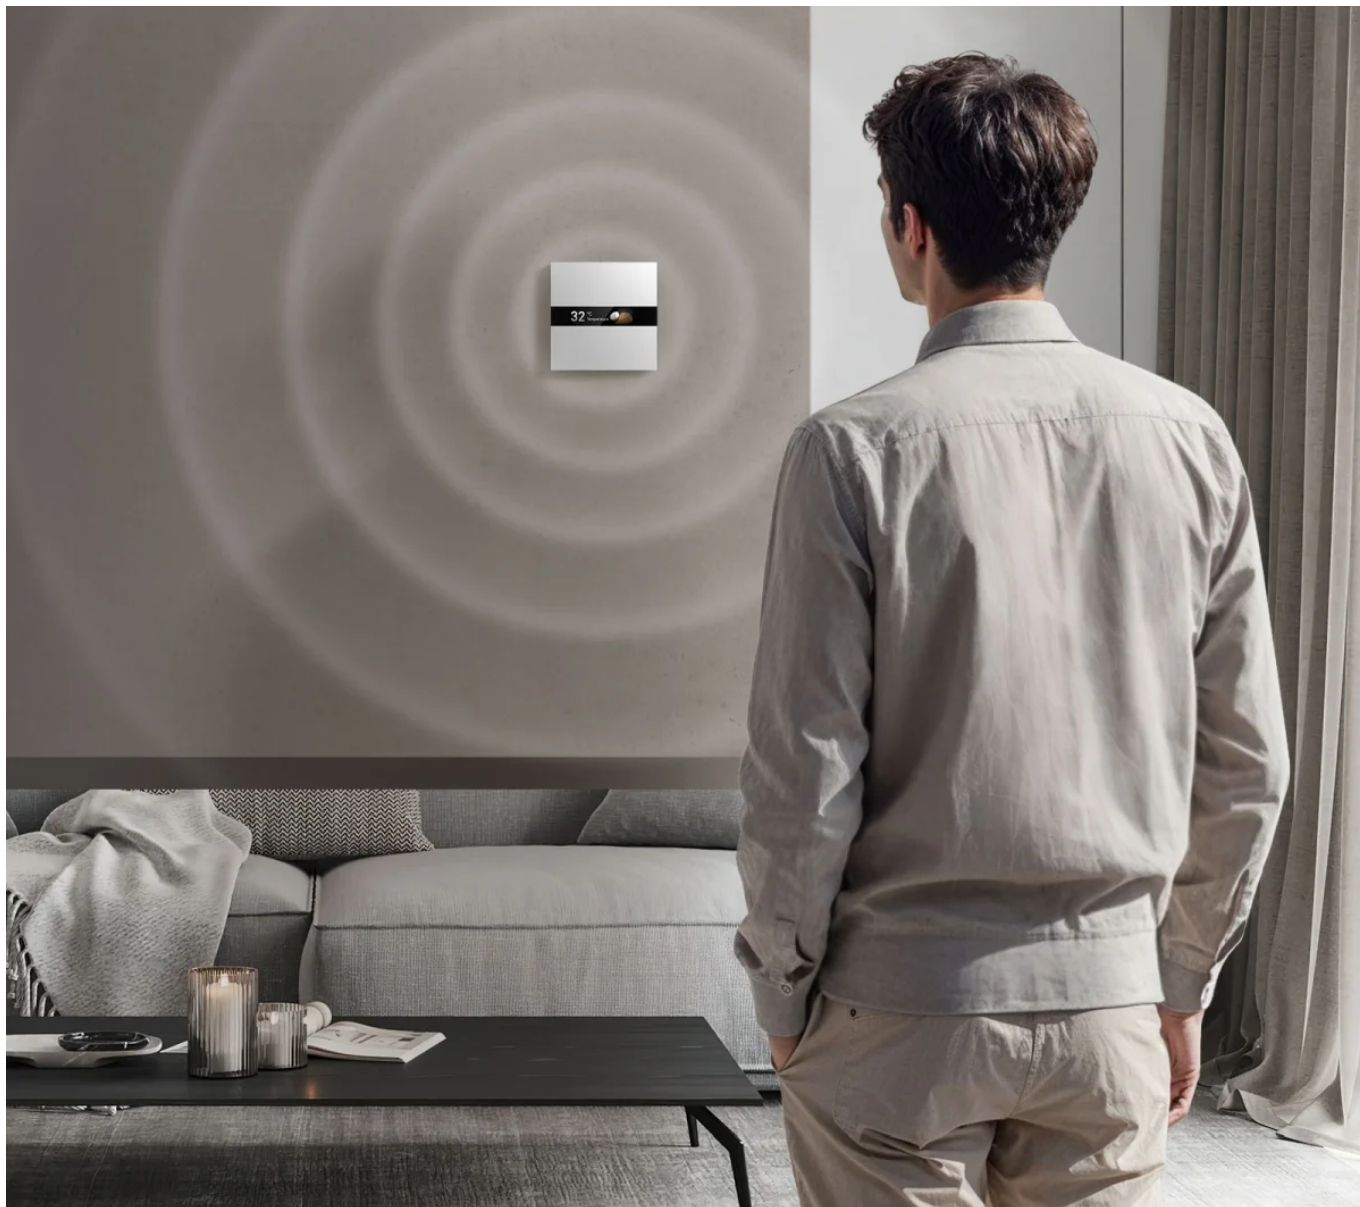

Integration with ecosystems and communication stability

The switch supports Zigbee and Matter over Bridge, allowing easy integration with popular ecosystems such as Apple Home, Amazon Alexa, Google Home, Samsung SmartThings, Home Assistant and Homey. Thanks to the Zigbee repeater function, the switch supports stable communication between devices in your home, ensuring reliable operation even in extensive networks.

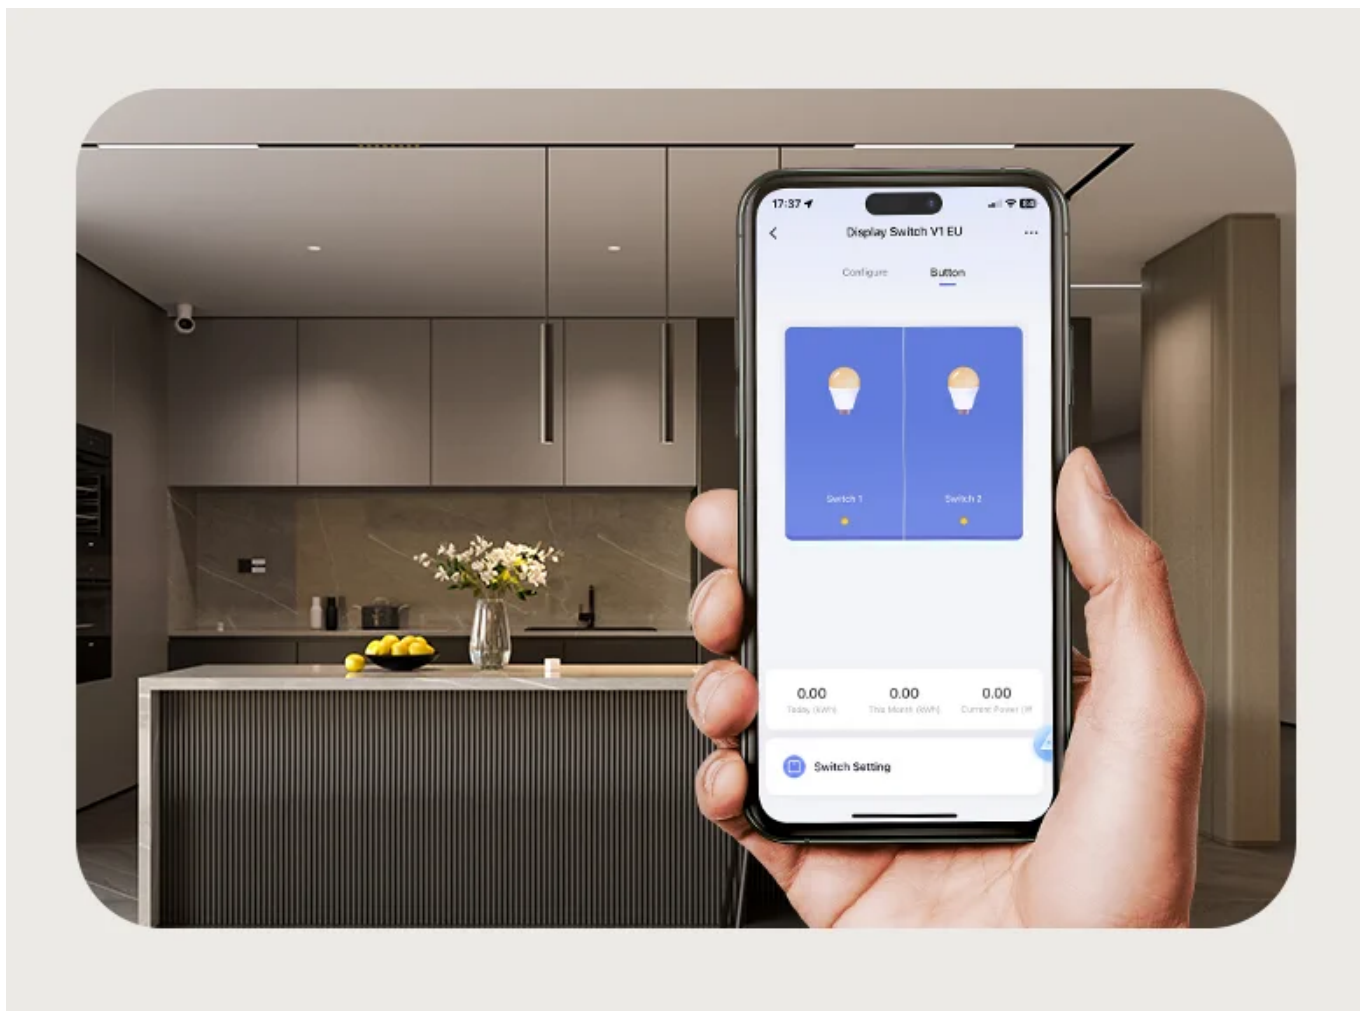

Proximity-activated automation

The built-in presence sensor allows the screen to be activated automatically when someone approaches the switch. Users can easily configure automation to adapt the device's operation to their preferences, providing even greater convenience and saving time.

Energy consumption monitoring

The Aqara Display Switch V1 has been equipped with a function for monitoring the energy consumption of connected devices. Thanks to detailed daily, weekly and monthly reports, users can optimise energy use, helping to reduce electricity bills and supporting sustainable energy consumption.

Exceptional build quality

The switch panel made of glass not only ensures durability, but also provides a pleasant-to-touch finish. The surface has been designed with aesthetics and convenience in mind – thanks to fingerprint-resistant technology, it always remains clean and smooth.
