Price: **629.99 zł** gross / 512.19 zł net

Manufacturer: AQARA

Referention number: DNXXGHJIQJRMMLK

Information:

Aqara Doorbell Camera Hub G410 Select is a 2K video doorbell that combines a camera, doorbell and smart home hub in one device. Thanks to mmWave radar and local facial recognition, it delivers accurate notifications with fewer false alarms, while the 175° view lets you see visitors and parcels in full frame. It supports Zigbee, Thread and Matter, and works with HomeKit Secure Video, Alexa, Google Home and Home Assistant. It offers local recording to microSD, NAS or encrypted cloud storage, privacy protection, an anti-tamper alarm and flexible battery or wired power.

Product features

Height	141.5 mm
Input voltage	12 V
Cartridge type	AA
Width	65 mm
Depth	30.4 mm
Battery voltage	1.5 V
Connection type	Wireless
Humidity measurement range	0 - 90%
IFU / User manual	Yes
Operating temperature (T-T)	18 - 50 °C
Screws included	Yes
Maximum memory card size	512 GB
Compatible memory cards	MicroSD (TransFlash)
Mounting bracket(s) included	Yes
Wi-Fi standards	802.11a
Wi-Fi	Yes

AC input frequency	50 Hz
Number of batteries supported	6
Power source type	AC
Product colour	White
Baby unit batteries included	Yes

Full product description

Your home under full control

Discover the **Aqara Doorbell Camera Hub G410 Select**, which combines the clarity of **2K video**, intelligent detection and a smart home control centre. The built-in **millimetre-wave radar (mmWave)** and **local face recognition** help deliver accurate notifications without false alarms. It is more than a doorbell – it is the heart of your smart home ecosystem, taking care of your security and convenience.

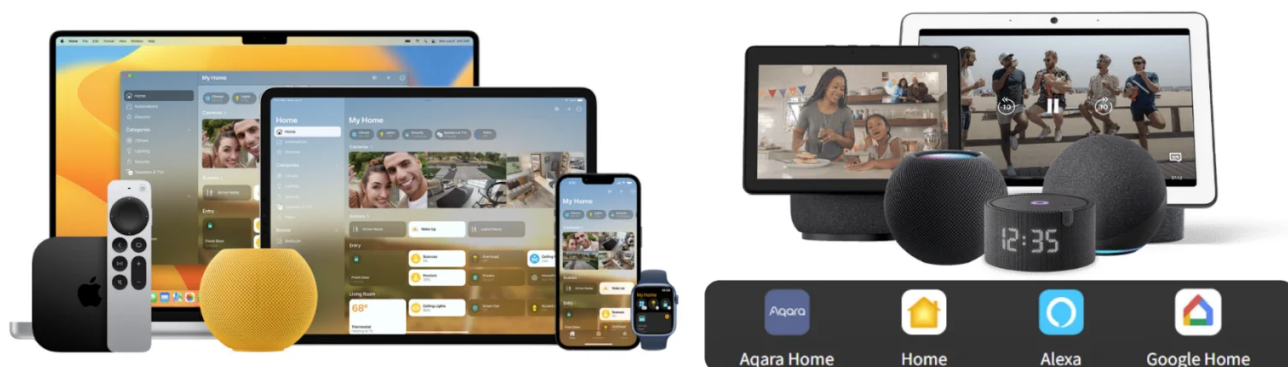

Key advantages of the Aqara G410 Select video door intercom

- **Smart home hub:** Integrates Zigbee, Thread and Matter devices, becoming the heart of your home.
- **Intelligent notifications:** mmWave radar and local face recognition minimise false alerts.
- **Versatile compatibility:** Works with HomeKit Secure Video, Matter, Alexa and Google Home.
- **Privacy and security:** Offers local recording to a microSD card, NAS and encrypted cloud storage.
- **High video quality:** 2K resolution and a 175° wide-angle lens provide a clear image in all conditions.
- **Flexible installation:** Battery or wired power supply makes installation easy anywhere.

One hub, many systems

The home video door intercom offers support for key platforms, including **HomeKit Secure Video**. This means you can use secure, encrypted iCloud cloud storage. Support for **Matter**, RTSP streaming and advanced bridging means the doorbell works with **Home Assistant**, **Google Home**, **Alexa** and **SmartThings**. This enables local control, automations and seamless integration with your favourite ecosystem.

Integration with devices

The Aqara G410 camera intercom acts as a powerful hub that connects **Aqara Zigbee** devices and makes them available in the **Matter** standard. It also works as a **Thread border router**, allowing Matter devices from other manufacturers to be integrated **with the Aqara Home app**. This makes it possible to create a coherent and extensive system in which all elements communicate with each other, creating advanced automations.

Doorbell

2.4GHz Wi-Fi

Repeater

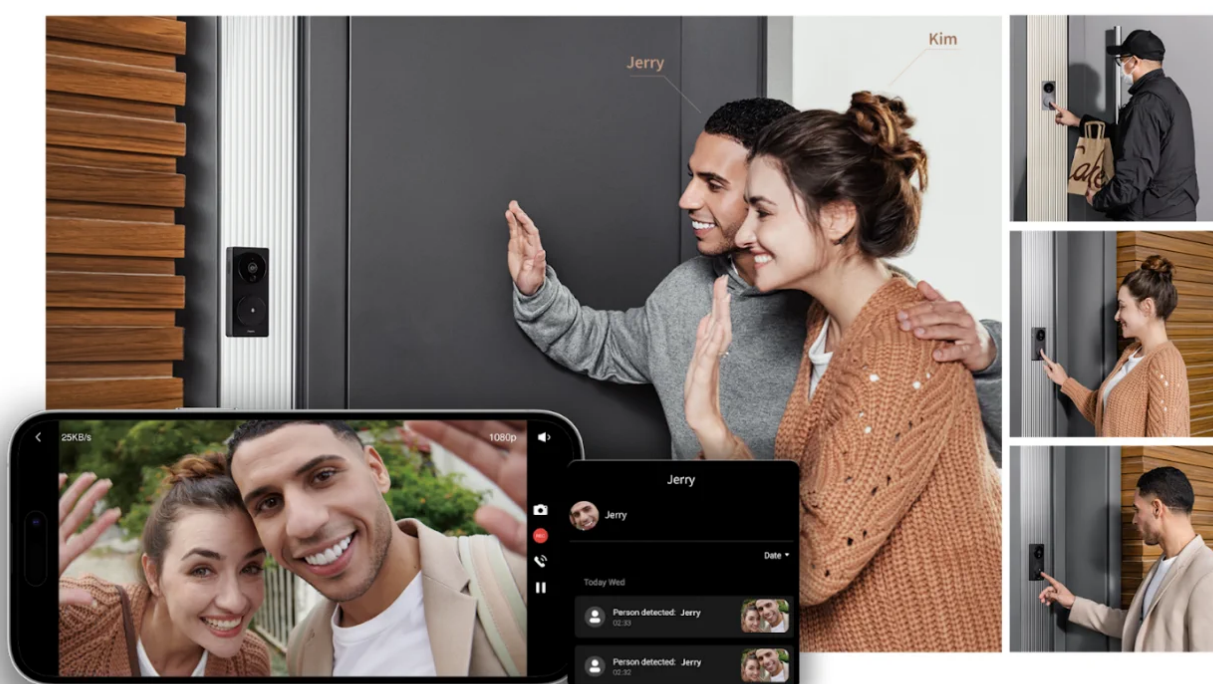

2.4/5GHz Wi-Fi

Router

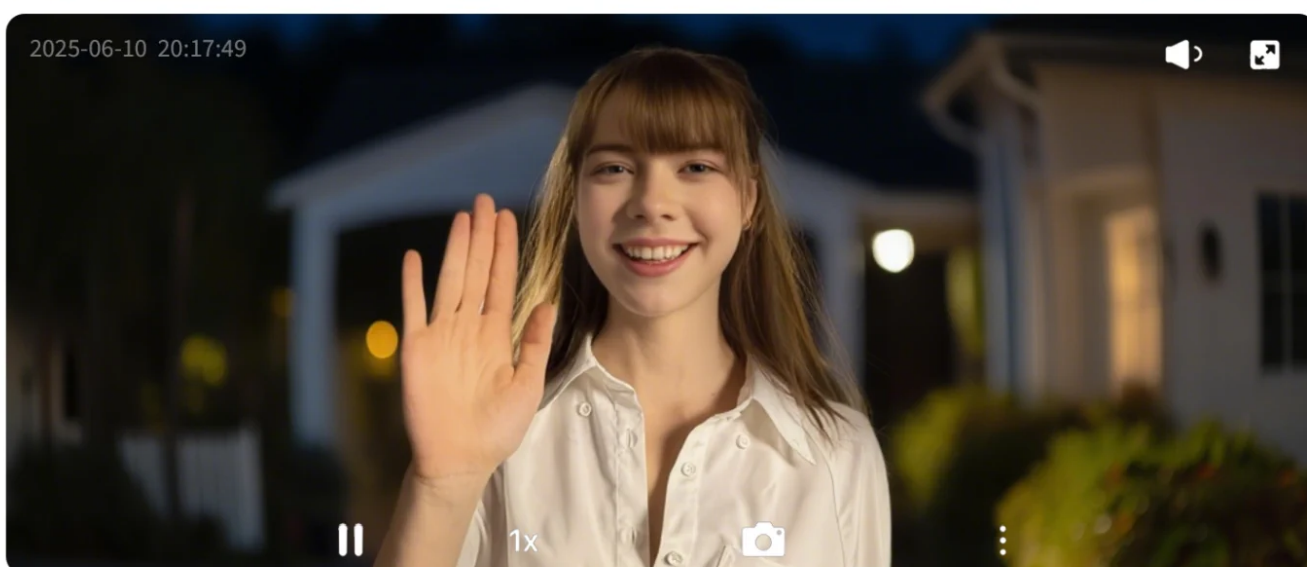

Intelligent detection

The built-in **mmWave millimetre-wave radar** contributes to precise presence detection, which reduces the number of unwanted notifications and positively affects battery life. **Face recognition** takes place locally on the device, without sending data to the cloud, which protects your privacy. The **anti-tamper alarm with built-in siren** deters potential intruders if they attempt to remove it.

2K quality image

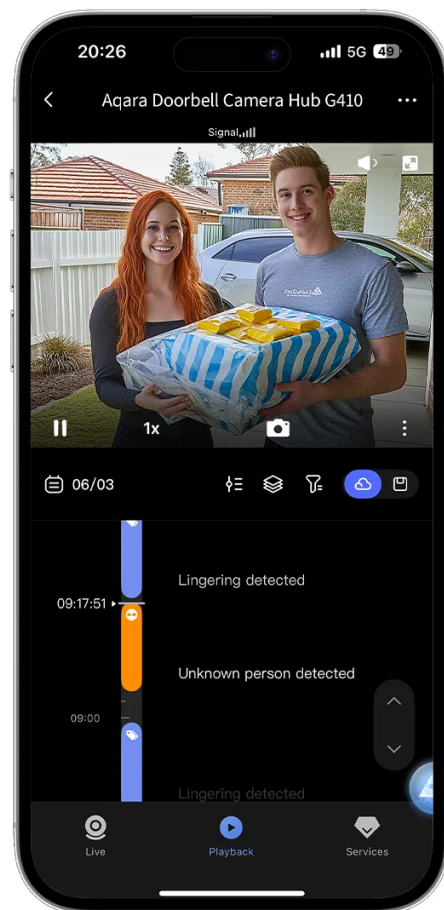

The camera offers high **2K resolution** and a wide-angle **175°** lens with an f/1.8 aperture. These specifications deliver a clear and detailed image at any time of day or night. The 4:3 aspect ratio allows you to see the visitor's full body, as well as parcels left by the door, giving you a complete view of what is happening at the entrance.

Protection for your recordings

The Aqara G410 offers three ways to store data, helping to keep your recordings safe. The internal **microSD card slot supports media up to 512 GB**, enabling **24/7 recording**. The device also supports recording to a network **NAS** drive and to encrypted cloud storage via the HomeGuardian plan. Your data is always protected and accessible.

512_{GB}

Power flexibility

The doorbell can be powered in two ways: using **six AA batteries** or by connecting it to an existing doorbell installation. Battery power, thanks to radar technology, lasts for up to 5 months. This solution provides power backup in the event of a power outage, ensuring continuous operation.

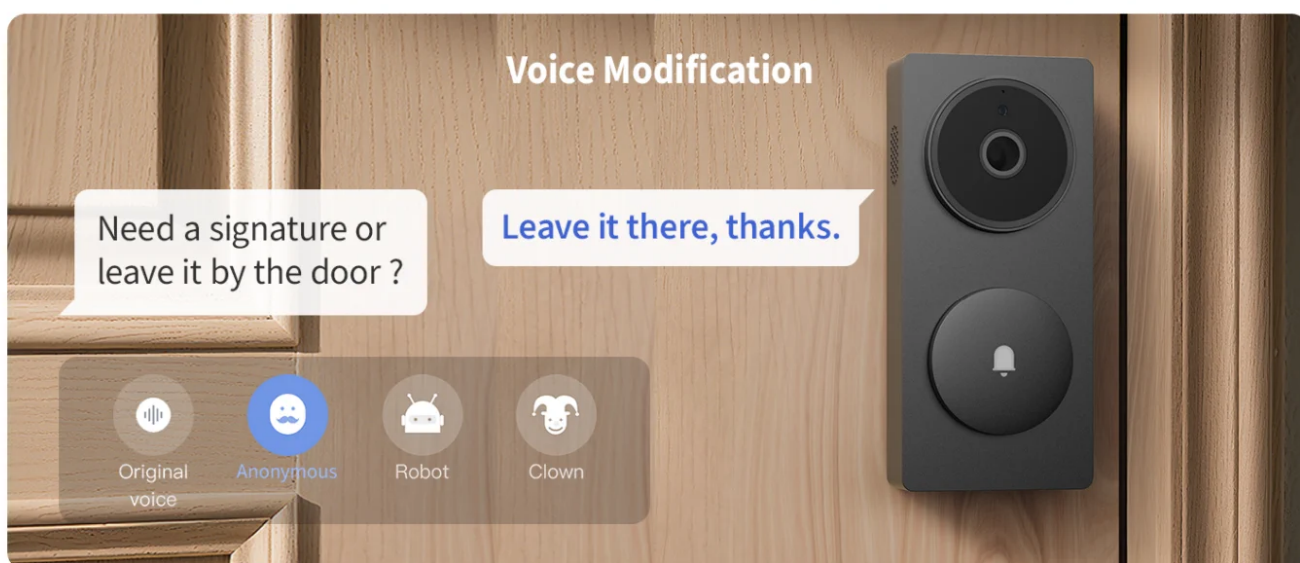

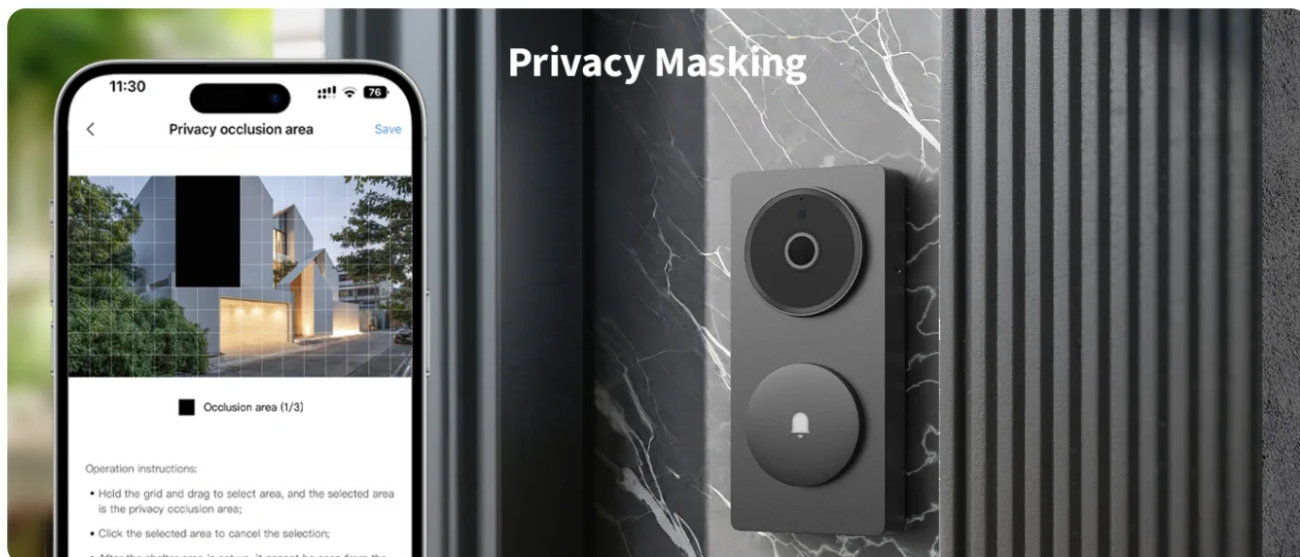

Bonus to get you started

Alongside the launch of the G410 Select, Aqara is introducing the **HomeGuardian cloud storage service**. Users receive a **free 3-month trial period**, which provides access to additional recording space and advanced AI features. It is a great opportunity to fully explore the capabilities offered by this advanced device.

Advanced privacy

Protect your family with features such as **privacy zone masking**, which permanently excludes sensitive areas from recordings. The **voice changing** technology offers four modulation options, helping to keep children and older people safe during conversations. Seamless integration with the Aqara system allows automatic image display and remote lock opening.

The Aqara G410 home video door intercom is an excellent choice for:

- People building their **smart home** based on Matter, Apple HomeKit, Google Home or Alexa ecosystems.
- Technology enthusiasts who value **local data processing** and advanced automations.
- Users looking for a solution that is both a **camera, doorbell and hub** for other devices.
- Families for whom **privacy protection** and data security are key.
- People renting flats who need a flexible, **battery-powered** solution.
