Full product description

EXTRALINK 2-in-1 Tourist Gas Stove - Your Reliable Companion on Every Camping Trip!

If you're planning a tenting, camping or camping trip, the EXTRALINK hiking stove is a must-have piece of equipment in your gear. Thanks to its compact size and lightweight design, you can easily fit it in your backpack, and the practical carrying case makes it easy to transport. Just connect a gas cartouche or a cylinder and cook your favorite dishes in the wild in comfort!

Compact and lightweight design

The EXTRALINK travel gas stove weighs just 1.6 kg, making it an ideal choice for any camping or camping trip. Its dimensions are 34 cm x 28 cm x 11 cm, so it takes up little space in your luggage. In addition, **the metal housing** provides durability and protection in harsher conditions.

Versatility and 2-in-1 power

This gas travel stove offers the ability to be powered by both a **gas cartridge** and a **gas cylinder**, giving you complete flexibility in a variety of situations. This allows you to use it seamlessly while camping, camping or in remote areas where access to energy may be limited. **The adjustable flame** allows you to adjust the intensity of cooking to suit your needs.

IDEAL FOR CAMPING KITCHEN

Convenient cooking even with large pots and pans!

High power and fuel efficiency

With an output of 2500 watts, the EXTRALINK stove allows you to quickly boil water or prepare a full meal. With **an economical gas consumption of 160 g/h**, you can rest assured that the fuel will last a long time. The burner's 8.5 cm diameter allows for even heat distribution, making cooking more efficient.

LIGHTWEIGHT AND FUNCTIONAL –
convenience wherever you are!

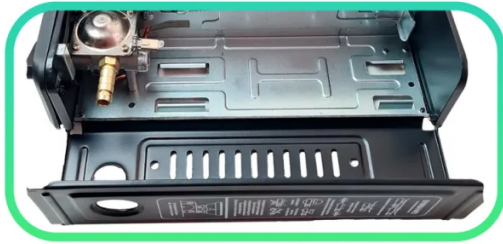

This versatile touring gas cooker offers the ability to run from both a gas cartridge and a gas cylinder, giving you complete flexibility in a variety of situations.

This means you can use it seamlessly for camping, camping, home emergencies and even in the workshop or allotment.

INSTRUCTIONS FOR USING

1. Open the lid –
gently open the lid of the stove.

2. Install the gas cartridge –
screw in the gas cartridge or connect the gas cylinder, according to the manufacturer's instructions.

3. Close the lid –
make sure the lid is properly closed to ensure safety.

4. Gas lock –
press the gas lock button to prevent leakage.

5. Start the stove –
turn the knob to turn on the gas, then use the piezo ignition to start the burner.

6. Use as intended –
cook safely, remembering to regularly check that the appliance is properly installed and safe to use.
