Price: **579.00 zł** gross / 470.73 zł net

Manufacturer: AQARA

Referention number: DNXGGMIPGRMMJI

Information:

Aqara Hub M3 is a versatile smart home hub focused on local automation, privacy and reliability without the need to use the cloud. It supports Aqara devices and Matter-compatible equipment from other brands, offers dual-band Wi-Fi, an RJ45 Ethernet port, PoE or USB-C power supply, and simple setup via Aqara Home and Magic Pair. The 360° rotating IR transmitter enables control of air conditioning and other devices, while cooperation with the climate sensor allows the temperature to be adjusted automatically. Hub M3 also makes migration from older hubs easier, ensuring fast operation, greater range and secure local data storage.

Product features

Height	36.5 mm
Input voltage	5 V
Width	105 mm
Depth	105 mm
Connectivity technology	Wireless
Input current	2 A
Humidity measurement range	0 - 95%
Operating temperature (T-T)	-10 - 50 °C
Package depth	111 mm
Package height	58 mm
Package width	112 mm
Package type	Box
ZigBee	Yes
Wi-Fi standards	802.11a
Wi-Fi	Yes

Bluetooth	Yes
Product colour	Black
Built-in display	No
Product weight	330 g

Full product description

The latest dimension of home automation: Aqara Hub M3

Aqara Hub M3 introduces a revolution in the world of **smart homes**, focusing on privacy and local management without the need to use the Internet or additional hubs. This versatile bridge offers a range of connection options, including **dual-band Wi-Fi and PoE (Power over Ethernet)**, and is equipped with a 360° rotating IR transmitter that integrates air conditioning with the **Matter** system. Thanks to real-time cooperation with a climate sensor, Hub M3 adjusts the temperature to current needs.

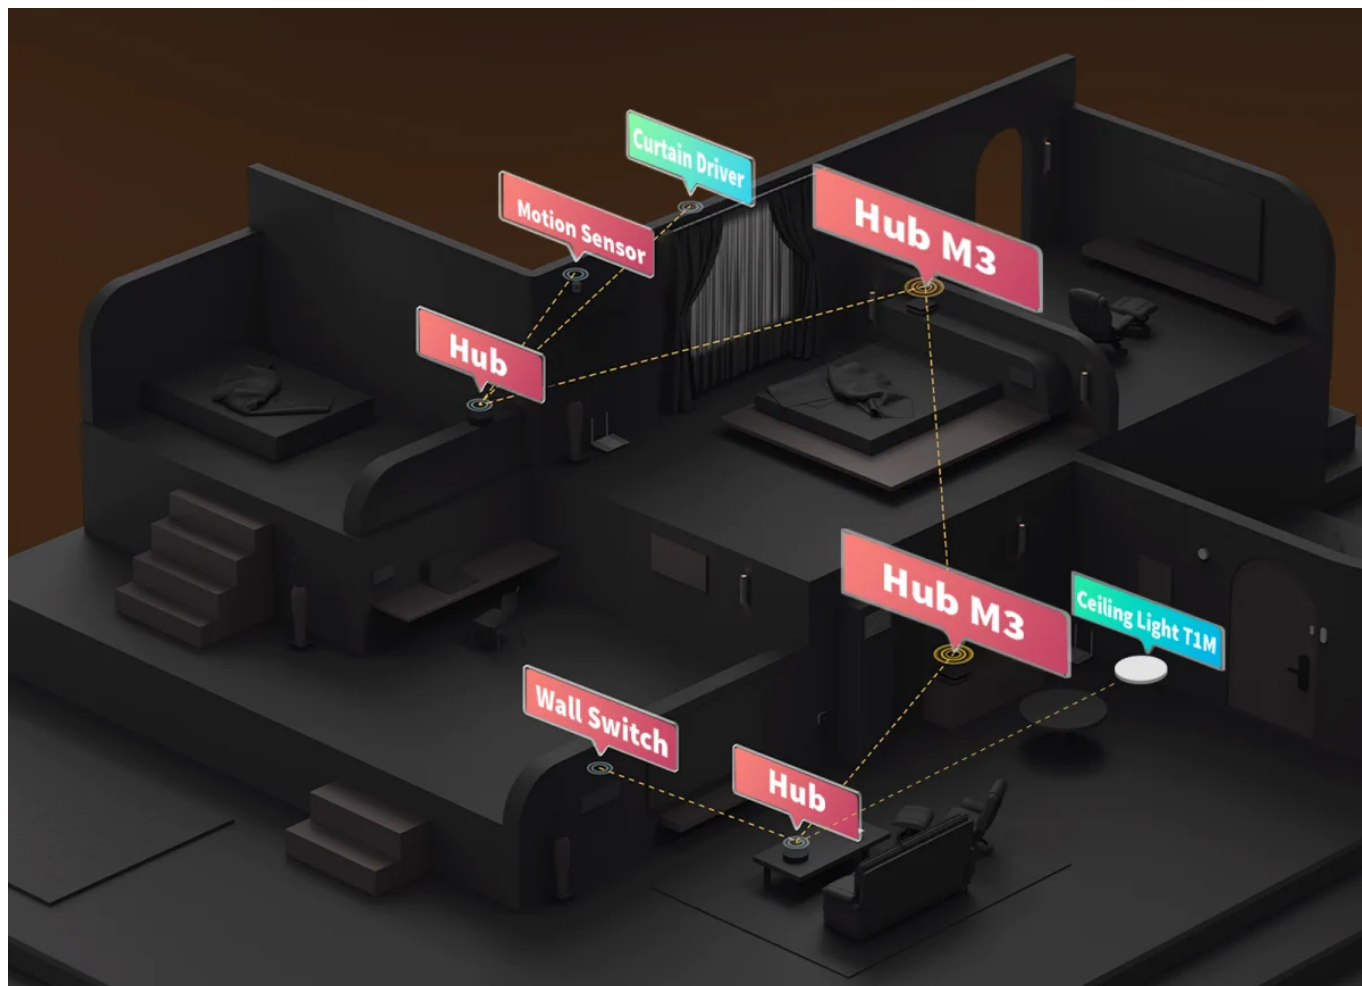

Multi-protocol integration and easy setup

Hub M3 is a multi-protocol bridge that, for the first time, integrates **Aqara** devices and third-party devices supporting **Matter**. It guarantees not only privacy protection, but also **seamless setup**. Forget worries about wireless protocols – enjoy the convenience and functionality offered by your smart devices.

Local control and reliability

M3 is an improved version of previous Aqara hubs, moving automation from the cloud to local devices, increasing stability and management. The "hub replacement" function enables easy upgrades from older models, ensuring smooth automation and control.

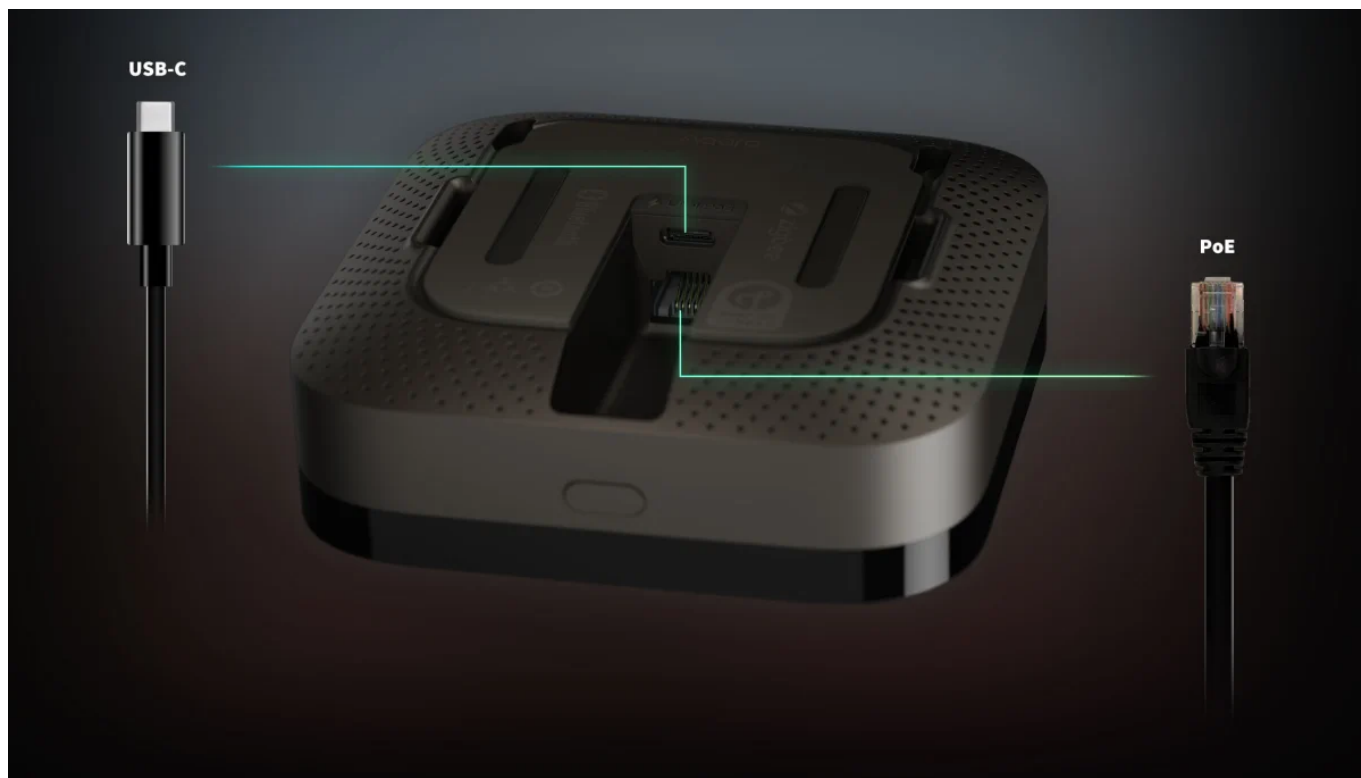

Control of air conditioning and more thanks to infrared

With the **Aqara M3 smart home bridge**, you gain seamless control over **IR devices** and **AC thermostats** via Matter, which is the **first such solution in Apple Home**. Place the M3 close to the air conditioner so that any setting changes are instantly reflected in the **Aqara app**, creating a unified smart home experience.

Exceptional wired and wireless connectivity

Enjoy faster speeds, better range and a more reliable Internet connection thanks to **dual-band Wi-Fi** and the **RJ45 port**. Hub M3 also offers flexible power options via **PoE** and **USB Type-C**.

Privacy and secure data storage

Hub M3 enhances your privacy by storing data directly on the device, without sending it to the cloud, which protects your personal information.

Easy setup, wherever you want

Aqara M3 smart home bridge is designed with flexibility in mind, offering various power and connection options as well as simple connectivity and setup via the **Aqara Home app** thanks to the **Magic Pair** function, making it user-friendly even for beginners and in various installation scenarios.

Powerful speaker for every situation

Hub M3 has a speaker that **not only plays sounds, but also custom ringtones**. It can automatically trigger an alarm when the **P2 motion and light sensor** detects presence, fitting perfectly into your needs.
