Aqara

Manufacturer: AQARA

Referention number: DNXXGHHNRLRMNGJ

Information:

Aqara LED Bulb T2 GU10 is a smart bulb that offers adjustable brightness and colour temperature in the 2000-9000 K range, making it easy to tailor the light for work, relaxation or evening unwinding. It supports Zigbee and Thread, providing broad compatibility with Matter as well as Apple Home, Google Home and Alexa systems. A brightness of 450 lm, Adaptive Lighting, memory of settings after a power outage and the ability to create automations in Aqara Home make it a convenient, energy-efficient and modern solution for the smart home.

Product features

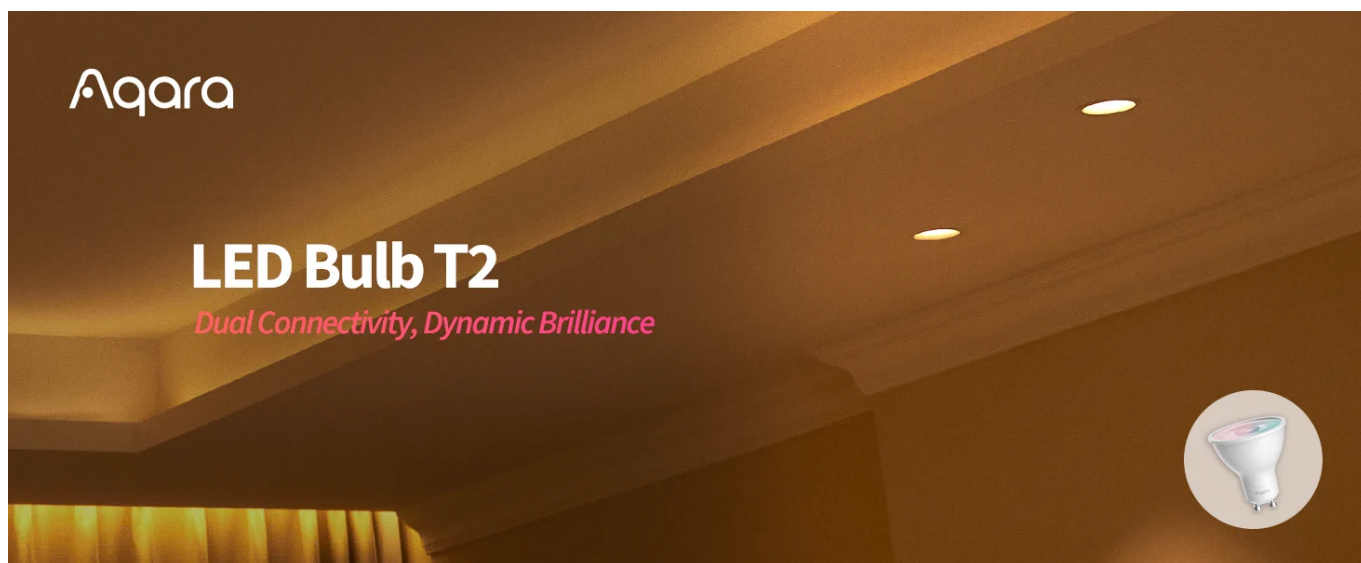

Height	54 mm
Input voltage	100 V
Works with the Google Assistant	Yes
Fitting/cap type	GU10
Interface	Bluetooth/Zigbee
Humidity measurement range	0 - 95%
Power consumption (standby)	0.4 W
Operating temperature (T-T)	-10 - 40 °C
Works with Apple HomeKit	Yes
Works with Amazon Alexa	Yes
Color Rendering Index (CRI)	90
Colour temperature (min)	2700 K
Colour temperature (max)	6500 K
Luminous flux	450 lm
AC input frequency	50 Hz
Beam angle (max)	50 °

Bulb power	4.9 W
Equivalent bulb power	30 W
Product colour	White
Bulb lifetime	25000 h
Type	Smart bulb
Diameter	50 mm
Product weight	55 g

Full product description

Lighting that adapts to you

Aqara LED Bulb T2 GU10 is a smart bulb that will change the way you think about lighting in your home. With the ability to adjust brightness and colour temperature for every moment and mood, it provides exceptional lighting quality in any space. It offers full smart home compatibility, as well as reliability and energy efficiency. It is the ideal choice for people who value comfort, functionality and modern design.

Versatile compatibility for every system

The Aqara LED Bulb T2 GU10 supports two communication protocols - Zigbee and Thread - making it extremely flexible and easy to integrate with various smart home ecosystems. In Zigbee mode, you can use the advanced functions available in the Aqara app and full Matter compatibility. Thread mode, on the other hand, enables direct connection with systems such as Apple Home, Google Home or Alexa. This means the bulb adapts to your preferred system, offering fast and stable performance.

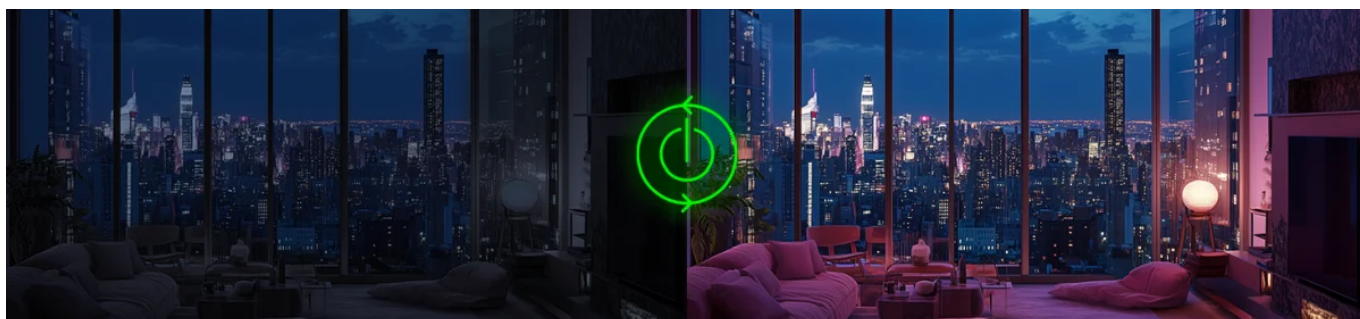

Lighting tailored to every situation

The Aqara LED Bulb T2 GU10 offers impressive light adjustment capabilities. With a brightness level of 450 lm and an adjustable colour temperature range from 2000K to 9000K, you can create both a warm, cosy atmosphere and bright, cool light for work.

Intelligent synchronisation with the rhythm of the day

Thanks to support for Apple HomeKit Adaptive Lighting, the Aqara LED Bulb T2 automatically adjusts the colour temperature of the light throughout the day. This solution supports the body's natural circadian rhythm, providing suitable lighting for morning activity, afternoon relaxation and evening winding down. With this function, your home becomes more comfortable and harmonious.

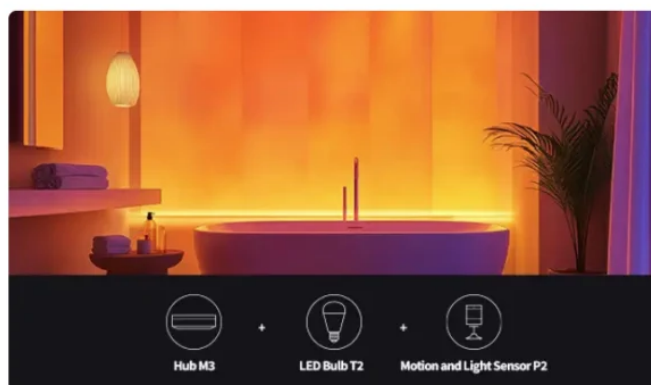

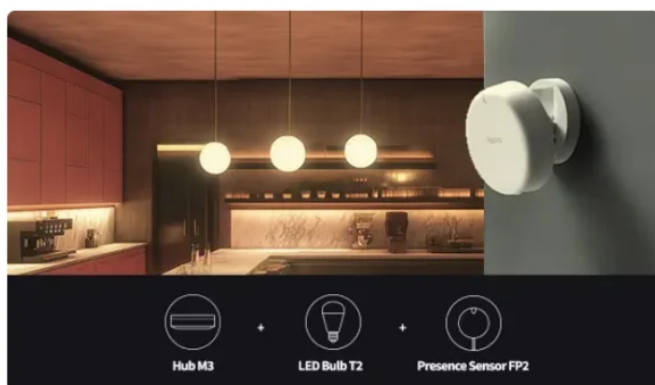

Safety and convenience

The power-off memory function guarantees that the bulb will retain the selected settings when the power is restored. You can decide whether the light should switch on automatically or remain off, preventing unwanted situations such as the light suddenly turning on in the middle of the night.

Personalisation and automation

The Aqara LED Bulb T2 offers extensive lighting customisation options via the Aqara Home app (iOS/Android) and external ecosystems. You can create and launch scenarios tailored to your lifestyle – from relaxing evening light to dynamic lighting effects for meeting friends. Thanks to precise brightness settings and smooth transitions, the bulb allows you to adjust the light to every moment and need.

Ideal choice for a smart home

Compatibility with Aqara switches and full integration with the smart home system make using the LED Bulb T2 extremely convenient and hassle-free. Precise control, smooth switching and advanced settings allow you to fully enjoy smart lighting that not only meets expectations, but also creates a unique atmosphere in every interior.
