Aqara

Manufacturer: AQARA

Referention number: DNXXGHHNRIRMMNM

Information:

Aqara LED Bulb T2 E27 RGB is a smart bulb with an E27 fitting that offers 1100 lm brightness, adjustable white light from 2000K to 9000K and 16 million colours, making it easy to match the lighting to your mood, work or relaxation. It supports Zigbee and Thread, ensuring broad compatibility with smart home systems, including Matter, Apple Home, Google Home and Alexa. The high colour rendering index Ra>90 guarantees a natural appearance of colours, while the Adaptive Lighting function automatically adjusts the light to the rhythm of the day. Memory of settings after a power outage increases convenience and safety.

Product features

Height	108 mm
Input voltage	100 V
Works with the Google Assistant	Yes
Fitting/cap type	E27
Interface	Bluetooth/Zigbee
Humidity measurement range	0 - 95%
Colour changing	Yes
Power consumption (standby)	0.4 W
Operating temperature (T-T)	-10 - 40 °C
Works with Apple HomeKit	Yes
Works with Amazon Alexa	Yes
Color Rendering Index (CRI)	90
Colour temperature (min)	2000 K
Colour temperature (max)	9000 K
Luminous flux	1100 lm

AC input frequency	50 Hz
Beam angle (max)	200 °
Bulb power	10.5 W
Equivalent bulb power	75 W
Product colour	White
Bulb lifetime	25000 h
Type	Smart bulb
Diameter	60 mm
Product weight	145 g

Full product description

Lighting that adapts to you

Aqara LED Bulb T2 E27 RGB is a smart bulb that will change the way you think about lighting your home. With the ability to adjust brightness and light colour to suit every moment and mood, it provides exceptional lighting quality in any space. It offers full smart home compatibility, as well as reliability and energy efficiency. It is the ideal choice for those who value comfort, functionality and modern design.

Versatile compatibility for every system

The Aqara LED Bulb T2 E27 RGB supports two communication protocols - Zigbee and Thread - making it extremely flexible and easy to integrate with various smart home ecosystems. In Zigbee mode, you can use the advanced features available in the Aqara app and full Matter compatibility. Thread mode, on the other hand, enables direct connection with systems such as Apple Home, Google Home or Alexa. This means the bulb adapts to your preferred system, offering fast and stable performance.

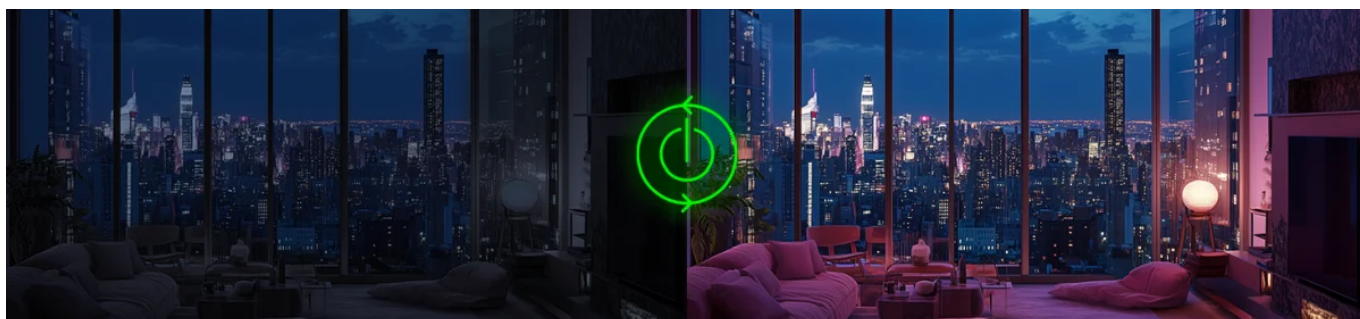

Lighting tailored to every situation

The Aqara LED Bulb T2 E27 RGB offers impressive light adjustment capabilities. With a brightness level of 1100 lm and an adjustable colour temperature range from 2000K to 9000K, you can create both a warm, cosy atmosphere and bright, cool light for work. In addition, 16 million colours allow for creative lighting experiments, making this bulb the perfect choice for any occasion – from relaxation to parties. A high colour rendering index ($R_a > 90$) ensures that the colours in your interior will look natural and vivid.

Intelligent synchronisation with the rhythm of the day

With support for Apple HomeKit Adaptive Lighting, the Aqara LED Bulb T2 RGB automatically adjusts the light colour temperature throughout the day. This solution supports the body's natural circadian rhythm, providing suitable lighting for morning activity, afternoon relaxation and evening winding down. With this function, your home becomes more comfortable and harmonious.

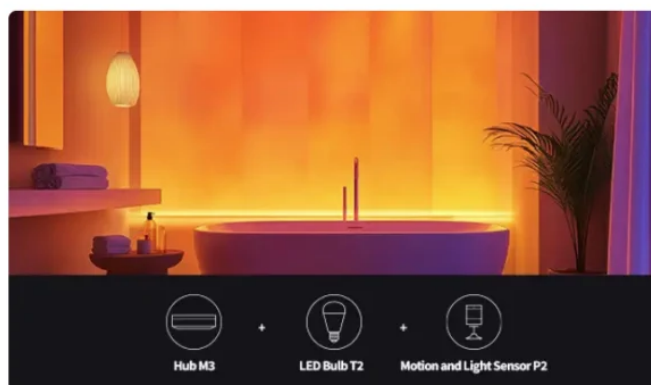

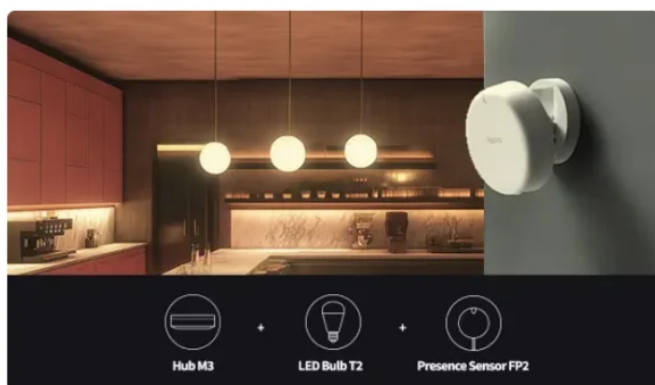

Safety and convenience

The power-off memory function ensures that the bulb retains your selected settings when the power is restored. You can decide whether the light should switch on automatically or remain off, preventing unwanted situations such as the light suddenly turning on in the middle of the night.

Personalisation and automation

The Aqara LED Bulb T2 offers extensive lighting customisation options via the Aqara Home app (iOS/Android) and external ecosystems. You can create and launch scenarios tailored to your lifestyle – from relaxing evening light to dynamic lighting effects for meeting friends. Thanks to precise brightness settings and smooth transitions, the bulb allows you to adjust the light to every moment and need.

The ideal choice for a smart home

Compatibility with Aqara switches and full integration with the smart home system make using the LED Bulb T2 extremely convenient and hassle-free. Precise control, smooth switching and advanced settings allow you to fully enjoy smart lighting that not only meets expectations, but also creates a unique atmosphere in every interior.
