Aqara

Manufacturer: AQARA

Referention number: DNXXGHHNRKRMPK

Information:

Aqara LED Bulb T2 GU10 RGB is a smart home bulb that combines full light customisation with high functionality. It supports Zigbee and Thread, making it easy to integrate with Aqara, Apple Home, Google Home, Alexa and Matter. It offers 450 lm brightness, colour temperature adjustment from 2000K to 9000K and 16 million colours, while the high Ra>90 rating ensures natural colour rendering. Adaptive Lighting automatically adjusts the light to the rhythm of the day, and power-off memory increases convenience and safety. This is energy-efficient, modern lighting for any interior.

Product features

Height	54 mm
Input voltage	100 V
Works with the Google Assistant	Yes
Fitting/cap type	GU10
Interface	Bluetooth/Zigbee
Humidity measurement range	0 - 95%
Colour changing	Yes
Power consumption (standby)	0.4 W
Operating temperature (T-T)	-10 - 40 °C
Works with Apple HomeKit	Yes
Works with Amazon Alexa	Yes
Color Rendering Index (CRI)	90
Colour temperature (min)	2000 K
Colour temperature (max)	9000 K
Luminous flux	450 lm

AC input frequency	50 Hz
Beam angle (max)	50 °
Bulb power	4.9 W
Equivalent bulb power	30 W
Product colour	White
Bulb lifetime	25000 h
Type	Smart bulb
Diameter	50 mm
Product weight	55 g

Full product description

Lighting that adapts to you

Aqara LED Bulb T2 GU10 RGB is a smart bulb that will change the way you think about lighting in your home. Thanks to the ability to adjust brightness and light colour to suit every moment and mood, it provides exceptional lighting quality in any space. It offers full smart home compatibility, as well as reliability and energy efficiency. It is the ideal choice for those who value comfort, functionality and modern design.

Versatile compatibility for every system

The Aqara LED Bulb T2 GU10 RGB supports two communication protocols - Zigbee and Thread - making it extremely flexible and easy to integrate with various smart home ecosystems. In Zigbee mode, you can use the advanced features available in the Aqara app and full Matter compatibility. Meanwhile, Thread mode enables a direct connection with systems such as Apple Home, Google Home or Alexa. As a result, the bulb adapts to your preferred system, offering fast and stable performance.

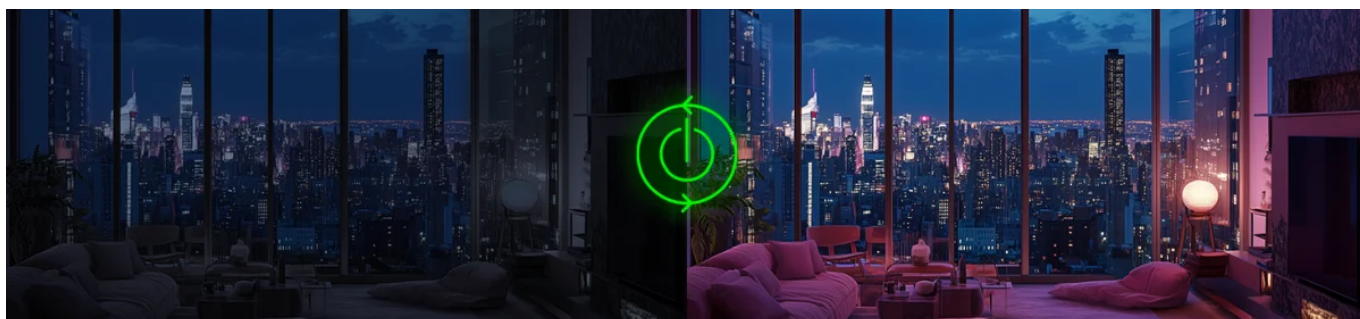

Lighting tailored to every situation

Aqara LED Bulb T2 GU10 RGB provides impressive light adjustment capabilities. With a brightness of 450 lm and an adjustable colour temperature range from 2000K to 9000K, you can create both a warm, cosy atmosphere and bright, cool light for work. In addition, 16 million colours allow for creative lighting experiments, making this bulb the perfect choice for any occasion - from relaxation to parties. The high colour rendering index ($R_a > 90$) ensures that the colours in your interior will look natural and vivid.

Intelligent synchronisation with the rhythm of the day

Thanks to support for Apple HomeKit Adaptive Lighting, the Aqara LED Bulb T2 automatically adjusts the light colour temperature throughout the day. This solution supports the body's natural circadian rhythm, providing suitable lighting for morning activity, afternoon relaxation and evening winding down. With this feature, your home becomes more comfortable and harmonious.

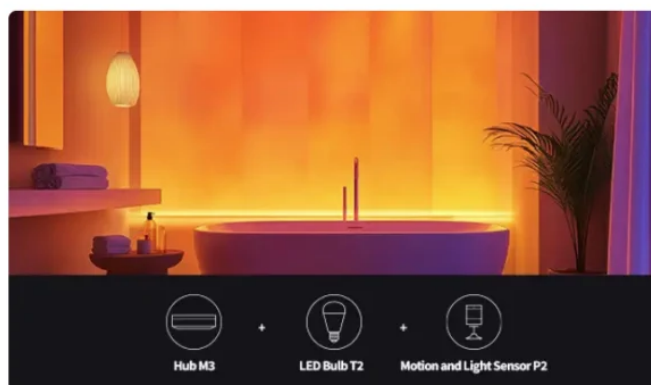

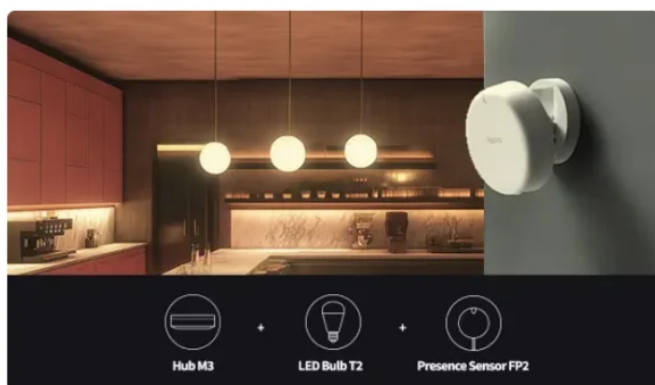

Safety and convenience

The power-off memory function guarantees that the bulb will retain the selected settings when power is restored. You can decide whether the light should switch on automatically or remain off, preventing unwanted situations such as the light suddenly turning on in the middle of the night.

Personalisation and automation

The Aqara LED Bulb T2 offers extensive lighting customisation options via the Aqara Home app (iOS/Android) and external ecosystems. You can create and launch scenarios tailored to your lifestyle – from relaxing evening light to dynamic lighting effects for meeting friends. Thanks to precise brightness settings and smooth transitions, the bulb allows you to adjust the light to every moment and need.

The ideal choice for a smart home

Compatibility with Aqara switches and full integration with the smart home system make using the LED Bulb T2 extremely convenient and hassle-free. Precise control, smooth switching and advanced settings let you fully enjoy smart lighting that not only meets expectations, but also creates a unique atmosphere in every interior.
