Aqara

Manufacturer: AQARA

Referention number: DNXXGKOKFRMMHJ

Information:

The 1 m extension for Aqara LED Strip T1 makes it easy to increase the length of the smart light strip, which can be extended to up to 10 metres. Aqara LED Strip T1 offers 16 million colours, adjustable white light and full control over each LED, enabling you to create gradients, animations and scenes tailored to the mood or time of day. Zigbee 3.0 support ensures a stable connection, while integration with Aqara Hub, Apple HomeKit, Amazon Alexa and Google Home allows you to control the lighting via smartphone, voice or automations. Easy installation, a flexible design and resistance to moisture and dust make the strip suitable for any interior.

Product features

Fixture dimmable	Yes
LED integrated	Yes
Suitable for light type	Ambience
Humidity measurement range	0 - 95%
Quick start guide	Yes
Colour changing	Yes
Operating temperature (T-T)	-10 - 40 °C
Bulb type	LED

AC adapter included	Yes
Length	1000 mm
Water-resistant	Yes
International Protection (IP) code	IP44
Suitable for indoor use	Yes
AC input frequency	50 Hz
AC input voltage	100 V
Mobile operating systems supported	Android
Power source type	AC
Dimmable	Yes
AC adapter output current	1.2 A
Light colour type	Multi
Product colour	White
Type	Universal strip light
Designation	Indoor & outdoor
Sustainability compliance	Yes

Full product description

1 m extension for Aqara LED Strip T1 light strip

Aqara LED Strip T1 is a versatile RGB CCT light strip, which enables you to create extraordinary lighting effects at home or at work. You can choose from **16 million colours** and adjust the temperature and intensity of the white light to suit the mood, situation or time of day. **The light strip is programmable**, which means you can control each LED individually and create transitions, animations or scenes. **The extension adds 1 metre of length to the T1 strip**. The Aqara LED Strip T1 can be extended up to 10 metres.

With Aqara LED Strip T1 you can:

- Create amazing lighting effects with 16 million colours and adjustable white light
- Control each LED individually and create gradients, animations or scenes
- Control the light strip using a smartphone, tablet, voice or automation
- Pair the light strip with other Aqara sensors or controllers to create smart lighting scenarios
- Extend the light strip up to 10 metres using additional segments
- Install and use the light strip easily anywhere

Support for Zigbee 3.0 protocol and smart home ecosystems

Aqara LED Strip T1 works with the Zigbee 3.0 protocol, which provides fast and stable wireless communication with other smart devices. To make full use of the light strip, connect it to an **Aqara Hub** or other smart home platforms such as **Apple HomeKit**, **Amazon Alexa** or **Google Home**. This allows you to control the light strip using a smartphone, tablet, voice or automation. You can also pair the light strip with other Aqara sensors or controllers to create smart lighting scenarios.

Easy and quick installation and setup

Aqara LED Strip T1 is easy to install and use. Simply connect it to the power supply and place it anywhere using adhesive tape or mounting clips. The light strip is flexible and can be adapted to different shapes and surfaces. **You can stick it to a wall, ceiling, furniture, mirror or picture frame.** You can also use it as backlighting for a TV, monitor or desk. The light strip is **resistant to moisture and dust**, so you can also use it in the bathroom or kitchen.
