Referention number: DNXGGOMMMRMNGI

Information:

Extralink Icicle Curtain 500L is an impressive LED curtain with 500 diodes in warm white and a cold flash effect, creating an atmospheric festive decoration reminiscent of sparkling icicles. The varied icicle lengths of 30, 60 and 90 cm give the arrangement a natural, three-dimensional look, while the 20 m light section and 3 m power cable make it easy to decorate windows, balconies, terraces, fences, façades or interiors. The IP44 ingress protection rating also allows outdoor use, and the energy-efficient LEDs ensure low power consumption and convenient operation.

Full product description

Extralink Icicle Curtain 500L warm white + cold flash

Extralink Icicle Curtain 500L is a decorative light that helps create a cosy, festive atmosphere at home, in the garden, on the balcony or on a building façade. The combination of warm white light with a cold flash effect makes the lighting resemble sparkling ice icicles and blends well with winter arrangements.

Icicle effect with a subtle sparkle

The light curtain uses a layout of 500 LED diodes, in which warm white has been complemented with a cold flash effect. The flash appears every 10 diodes, giving the decoration a gently shimmering character without excessive intensity. This effect looks great on windows, railings, terraces and façades.

Length suited to larger arrangements

The set includes 20 metres of light section and 3 metres of power cable, allowing convenient placement of the lights over a larger area. This length is ideal for decorating the front of a house, a long window, a balcony, a fence or a selected area in the garden.

Varied icicle lengths

Icicles measuring 30 cm, 60 cm and 90 cm create a more natural lighting layout than a straight line of lights. As a result, the decoration looks light and spacious, and when hung it can resemble a winter illumination known from festive arrangements.

For the home, garden and seasonal decorations

The LED curtain can be used to decorate interiors, balconies, terraces, shop windows, gazebos and façades. The warm light creates a pleasant mood, while the cold flash adds a delicate festive sheen to the arrangement. It is a solution for Christmas decorations, winter parties and atmospheric displays.

Kurtyna sople 500 LED

Ciepły biały

— Długość ok. 20 m

IP44 protection and convenient use

The IP44 protection rating helps protect the lights from splashes, so the product is also suitable for selected outdoor arrangements. Energy-efficient LED diodes help reduce power consumption during longer use, and the cable length makes it easier to connect the decoration to a power source.
