Manufacturer: AQARA

Referention number: DNXXGGHSLRMMMK

Product features

Power source	AC
Height	21.4 mm
Width	42.9 mm
Depth	40 mm
Connectivity technology	Wired & Wireless
Operating frequency	2405 MHz
Works with the Google Assistant	Yes
Package weight	50 g
Interface	Zigbee 3.0
Humidity measurement range	0 - 95%
Neutral conductor required	No
Operating temperature (T-T)	0 - 35 °C
Wireless technology	ZigBee
User guide	Yes
Works with Amazon Alexa	Yes
Intelligent On/Off	Yes
Water-resistant	No
Easy to install	Yes
Works with Apple Siri	Yes
Sunrise/sunset control	Yes
AC input frequency	50 Hz
AC input voltage	100 V

Product colour	White
Mounting hardware type	Wall
Watch case material	Acrylonitrile butadiene styrene (ABS)
Designation	Indoor
Product weight	40 g

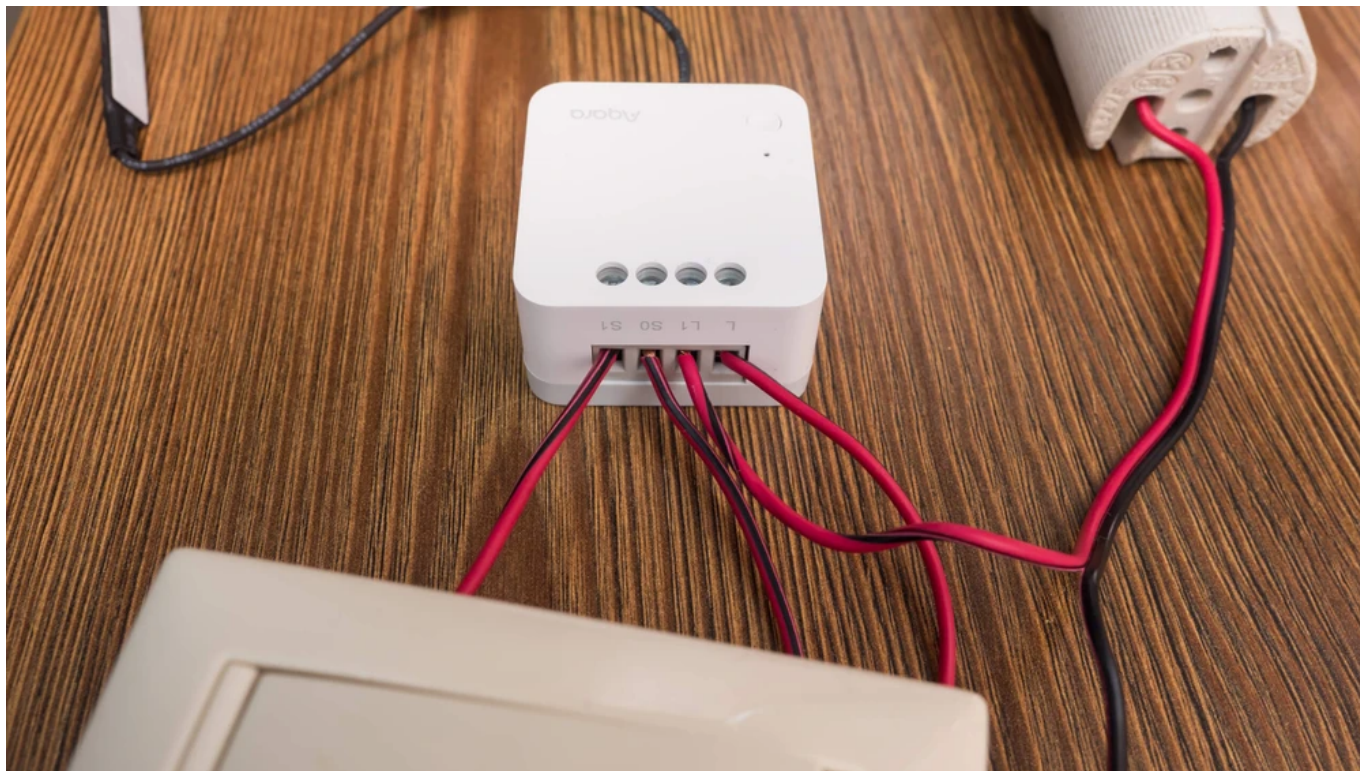

Full product description

Xiaomi Aqara SINGLE Switch MODULE T1 (without neutral)

The relay is designed to automate the control of lighting or electrical devices from **3 to 1250 watts**.

The relay is connected to the phase break and **does not require connection to the neutral line**. This allows it to be used in conjunction with a regular switch, adding "**smart switch**" functionality.

In addition to standard fixed switches, the relay also supports **bell-type switches**. The relay is compact in size and fits easily into an **ordinary socket**. The remote antenna can be placed behind the plastic switch hood or in the socket.
