Full product description

Aqara Smart Lock U200 Electronic Lock. Comfort and Security without Keys

The **Aqara Smart Lock U200 door lock** will allow you to take your security to the next level! With keyless access, a variety of door opening methods, and support for state-of-the-art smart home systems, the automatic Bluetooth lock provides not only convenience, but also the highest level of protection. **Simple installation without drilling**, durable construction and advanced security features make the Aqara U200 electronic door combination lock the **perfect solution for any modern home**.

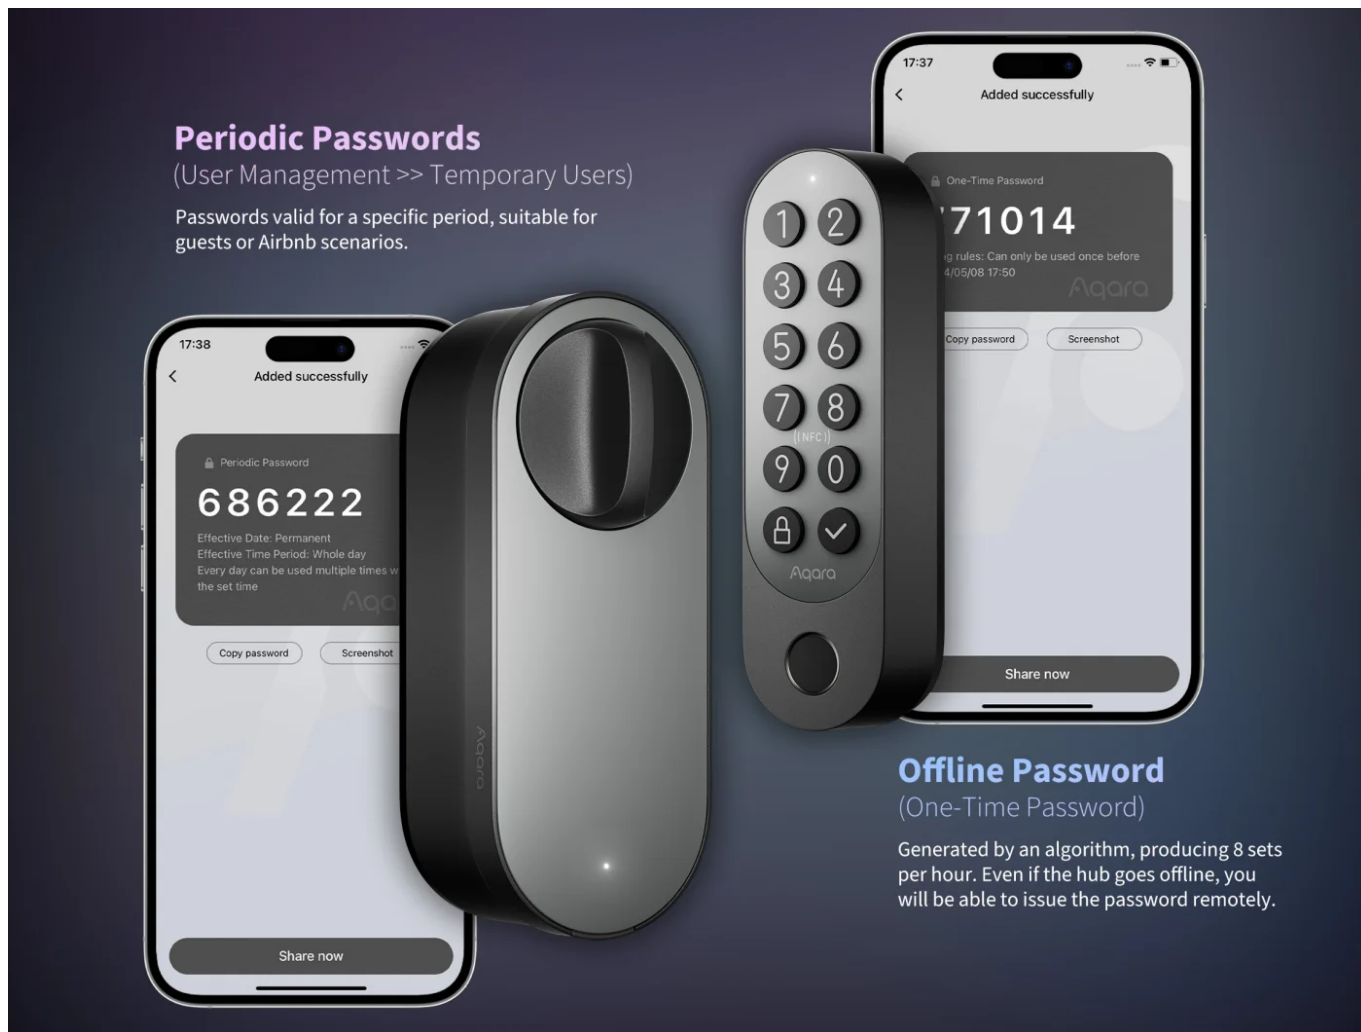

Automatic Lock. Multiple Opening Methods for your Convenience

The NFC Aqara Smart Lock U200 offers a variety of methods to open the door: **fingerprint reading**, **NFC** (opening the door with a phone or card), password, up to integration with Apple Home keys. Aqara U200 electronic door locks support the Matter standard, which allows **management via the Aqara Home app**. The durable design and **six-month battery life** combined with **IPX5 water resistance** make the U200 code lock ideal for both indoor and outdoor applications.

Advanced Features for Maximum Security

Control your front door code lock via app - via Bluetooth or remotely via Thread. Aqara Smart Lock U200 electronic front door locks support **temporary passwords, such as one-time and periodic passwords**, making it easy to share access. In an emergency, you can always use traditional mechanical keys. **Silent opening mode, automatic alerts** and contactless unlocking add to security and convenience.

Periodic Passwords

(User Management >> Temporary Users)

Passwords valid for a specific period, suitable for guests or Airbnb scenarios.

Offline Password

(One-Time Password)

Generated by an algorithm, producing 8 sets per hour. Even if the hub goes offline, you will be able to issue the password remotely.

Integration with Smart Home Systems

Thanks to its support for Matter over Thread, the Aqara U200 combination lock works perfectly with the most popular smart home systems, such as **Apple Home** and **Google Home**. A long-lasting battery and efficient remote management are additional advantages that make Aqara U200 electronic locks provide increased convenience.

Resilience and Durability in All Conditions

The U200's advanced engineering includes **IPX5 water resistance**, an operating temperature range of **-15°C to 66°C**, and power from a variety of sources: **a rechargeable Li-Ion battery** for the lock (up to 6 months), **AAA batteries** for the keypad, and a **wired power option**. All this ensures that the Aqara U200 electric lock works flawlessly and adapts to different environmental conditions.

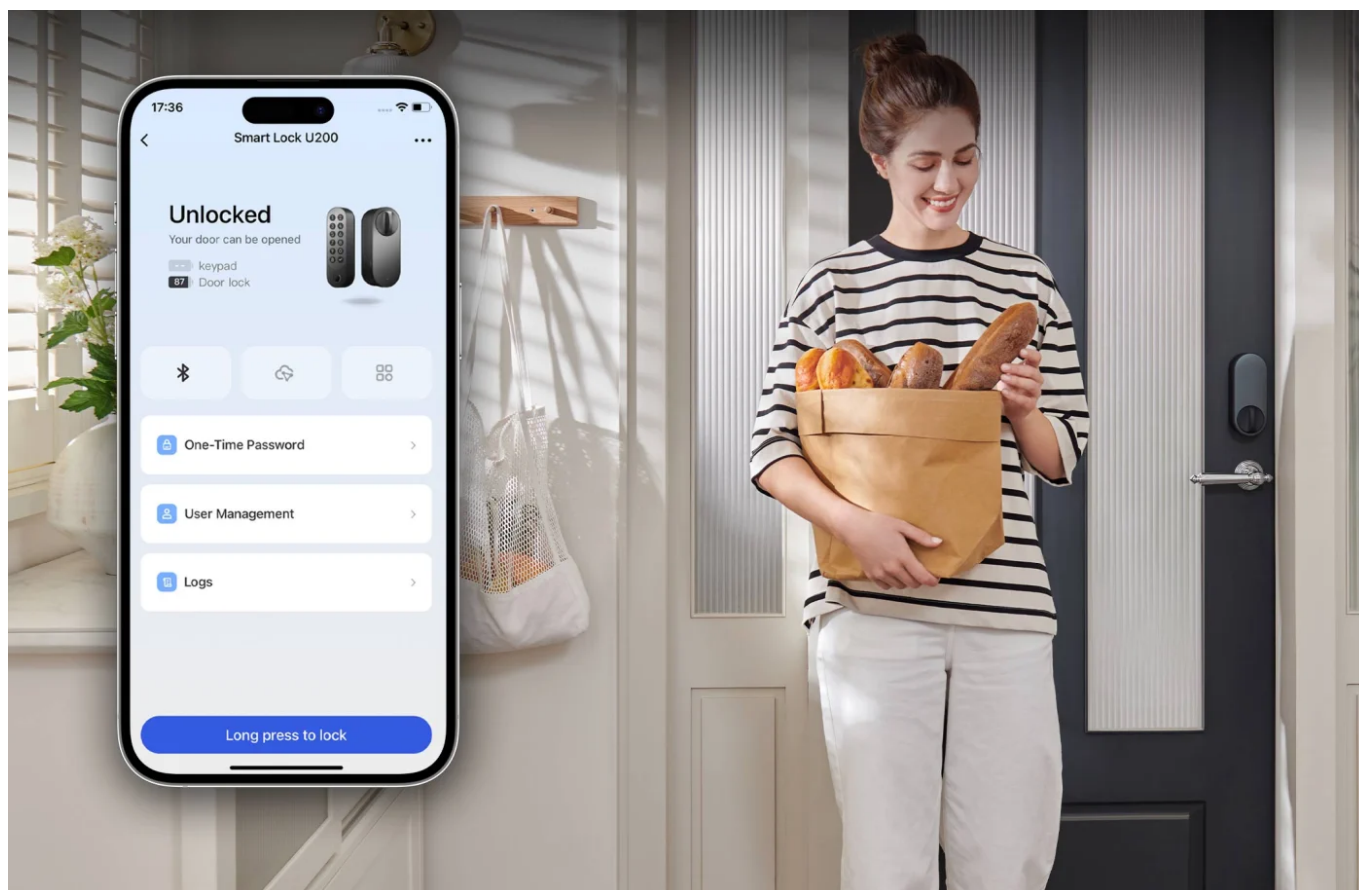

Simple installation on an existing lock. No drilling or cables

Upgrading your home security has never been easier! The **Aqara Smart Lock U200 digital door lock fits existing door locks without the need for modification**. Compatibility with Euro profiles and selected Scandinavian cylinders allows for easy and quick installation.

Highest Level of Data Security

The Aqara U200 Bluetooth lock uses an **advanced AES encryption algorithm and fingerprint module encryption**, which guarantees the highest level of security for your data and access points. The automatic door lock is a reliable choice for those who value security and privacy.
