Full product description

Smart home access

Transform your classic door and enter the world of convenience with **the Aqara Smart Lock U200 Lite** . This Smartphone-openable lock allows you to upgrade your existing lock without drilling or complicated modifications. It offers **keyless access** and seamless integration with your smart home ecosystem. Enjoy the freedom of opening your door with **an app** or a close-up of your phone thanks to **NFC** technology.

Key advantages of Aqara U200 Lite

- **Integration with the smart home ecosystem:** Support for the Matter over Thread standard enables seamless communication with multiple platforms.
- **Multiple access options:** Unlock via Bluetooth, NFC, remotely through an app or with voice commands.
- **Time and energy savings:** The powerful battery provides up to 6 months of operation, and charging via USB-C is fast and convenient.
- **Automated security:** Auto locking function and open door notifications ensure peace of mind.
- **Easy installation:** Mounting to an existing lock cylinder requires no drilling or specialized tools.

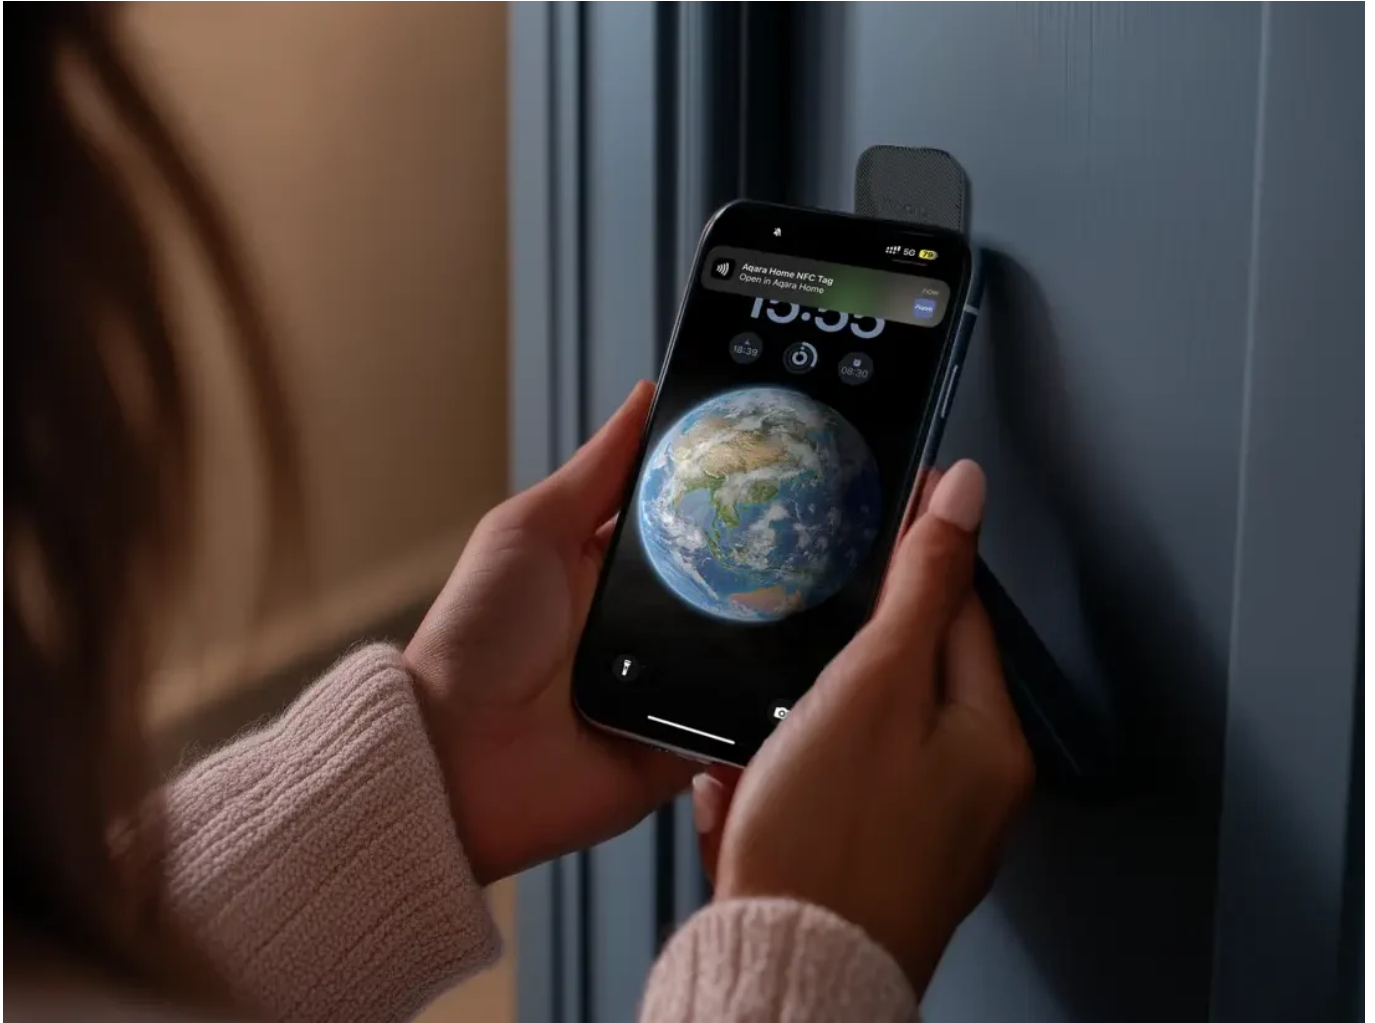

Standard Matter over Thread

The Aqara U200 Lite uses the **Matter over Thread** protocol, enabling seamless interoperability with leading platforms such as Apple Home, Google Home and Amazon Alexa. Thread technology, based on energy-efficient communication, contributes to a significant increase in battery life. Thanks to a self-repairing mesh network, the castle communicates with other devices in the vicinity, which contributes to **stable and fast operation**.

Convenient unlocking methods

The lock offers flexible ways to open the door. You can use **Bluetooth** unlocking on the Aqara app when you're out and about, or use **an NFC sticker** to quickly launch the app. The U200 Lite also supports **remote unlocking** (requires an additional hub), which is helpful when you're away from home. The device is compatible with **Siri and Alexa** voice assistants, allowing you to open your door with commands.

Long battery life

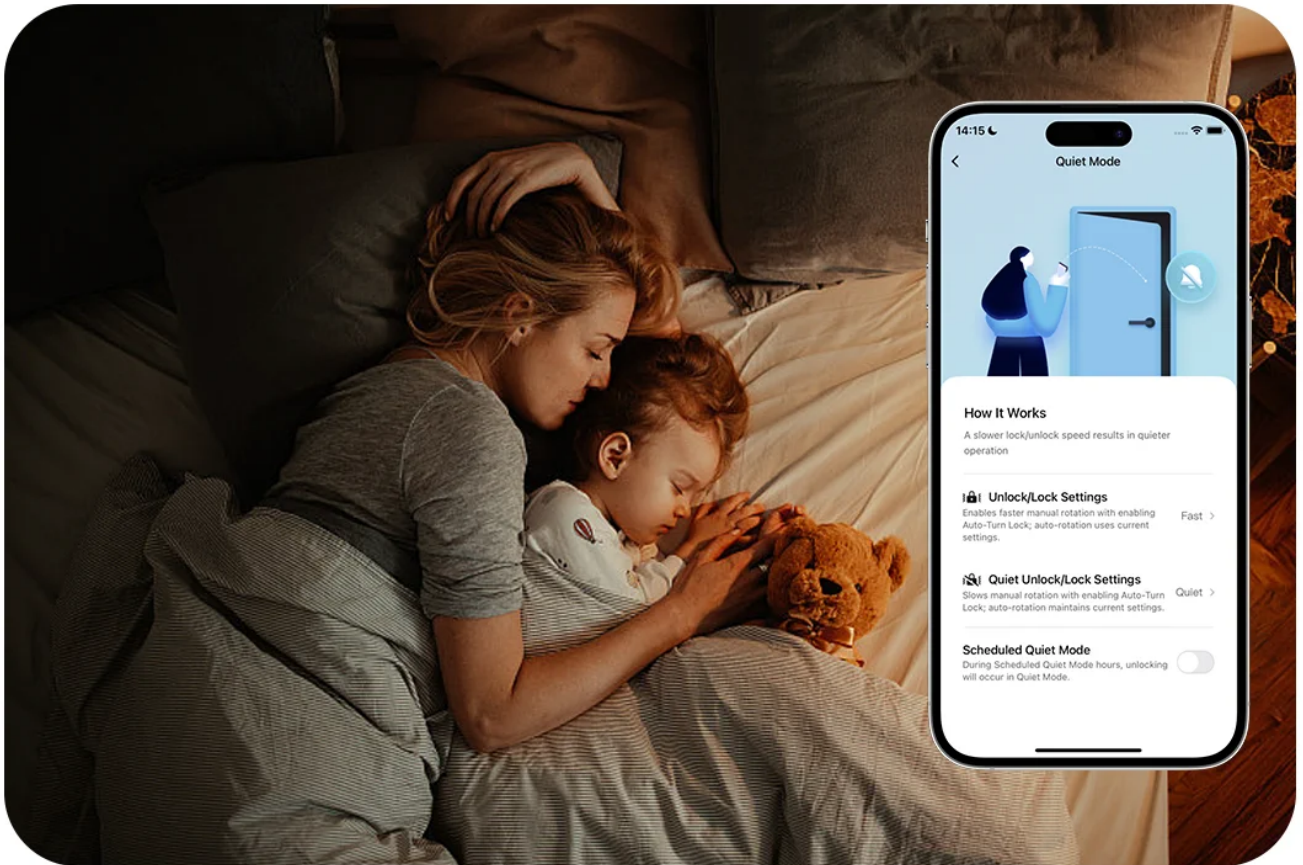

The lock is equipped with a 2000 mAh **lithium-ion battery** that allows it to operate for up to 6 months on a single charge, minimizing the need to operate it. A **low battery notification** feature gives peace of mind during use. The device has a **USB-C** charging port, which helps reduce the time it takes to fully charge the battery.

Automation and discretion

Thanks to its built-in gyroscope, the U200 Lite will remind you by beeping if a door is not closed and **will automatically lock the** door as soon as it is closed. Smart home integration is complemented by a **silent mode** that allows you to adjust the speed of the mechanism. Choose from three modes (Quiet, Standard, Fast) to match the lock's operation to the time of day and ensure the peace and quiet of your household at night.

Installation without modification

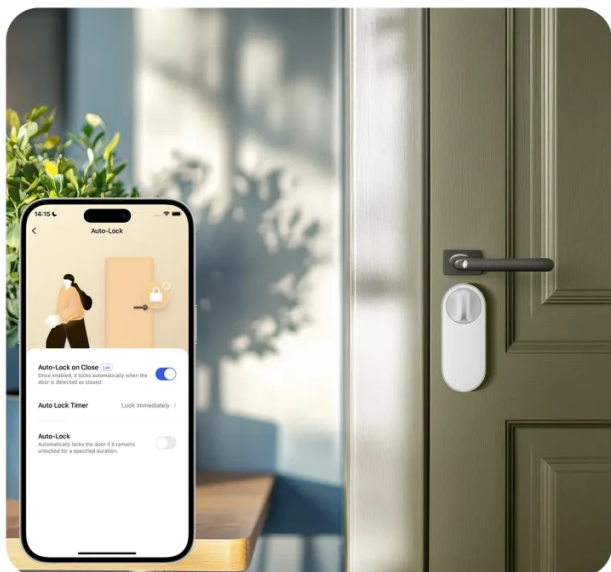

Installation of the kit is very simple and does not require complicated tools or drilling in the door. The lock fits into the existing mechanism, as long as the current cylinder has an emergency function. This allows the device to be mounted directly on the cylinder. The U200 Lite lock is compatible with popular **Euro-type** cylinders and selected models of Scandinavian cylinders.

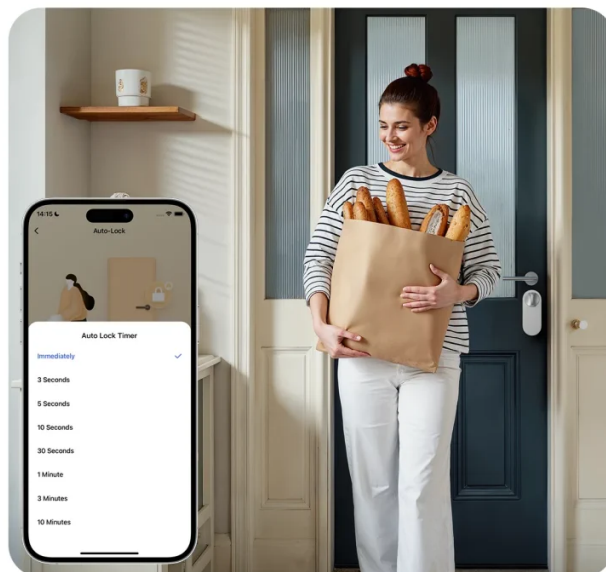

Extended functionality

The Aqara U200 Lite has a feature that **automatically retracts the lock latch** when unlocking, allowing you to open **the door hands-free**. This is useful when your hands are busy or you want to ensure a higher level of hygiene. This feature makes entry easier, especially for doors that open inward or have no handles. Just turn the knob 30-60 degrees and the lock will close or open by itself.
