Full product description

Aqara Wall Switch H1 EU (with neutral wire)

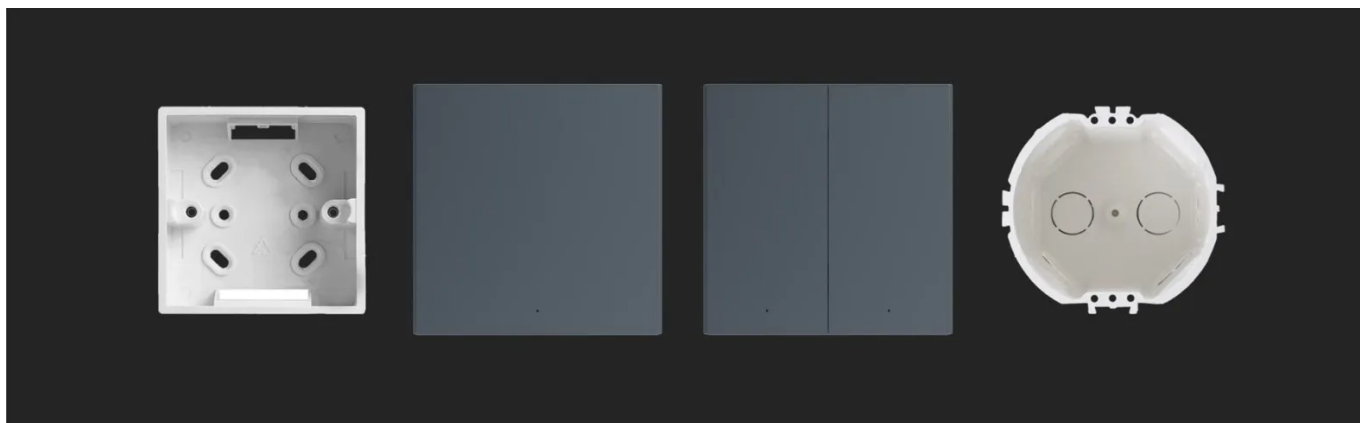

Discover the state-of-the-art **Aqara Smart Wall Switch H1 EU**, designed for the **smart home**. Using **Zigbee 3.0** wireless communication technology, this advanced switch provides a reliable and efficient connection for controlling **lighting** and other **electrical devices** in the home. Its compatibility with the **Aqara Home app** enables seamless remote control and time scheduling to enhance **home automation**.

Versatile and user-friendly design

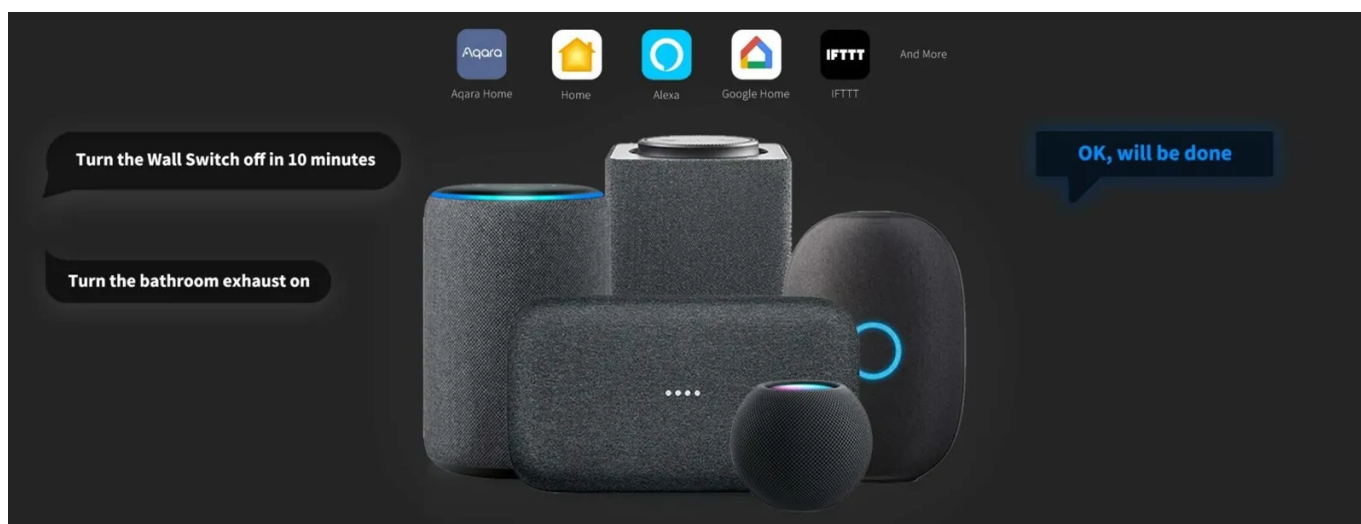

Aqara Wall Switch H1 EU is distinguished by its distinctive minimalist design, which is appreciated by most users. Its solid **metal**

construction guarantees durability, ensuring long-lasting functionality. The switch has been carefully designed to fit both traditional 86mm square wall boxes and round European wall boxes, making installation easy and intuitive in a variety of home configurations.

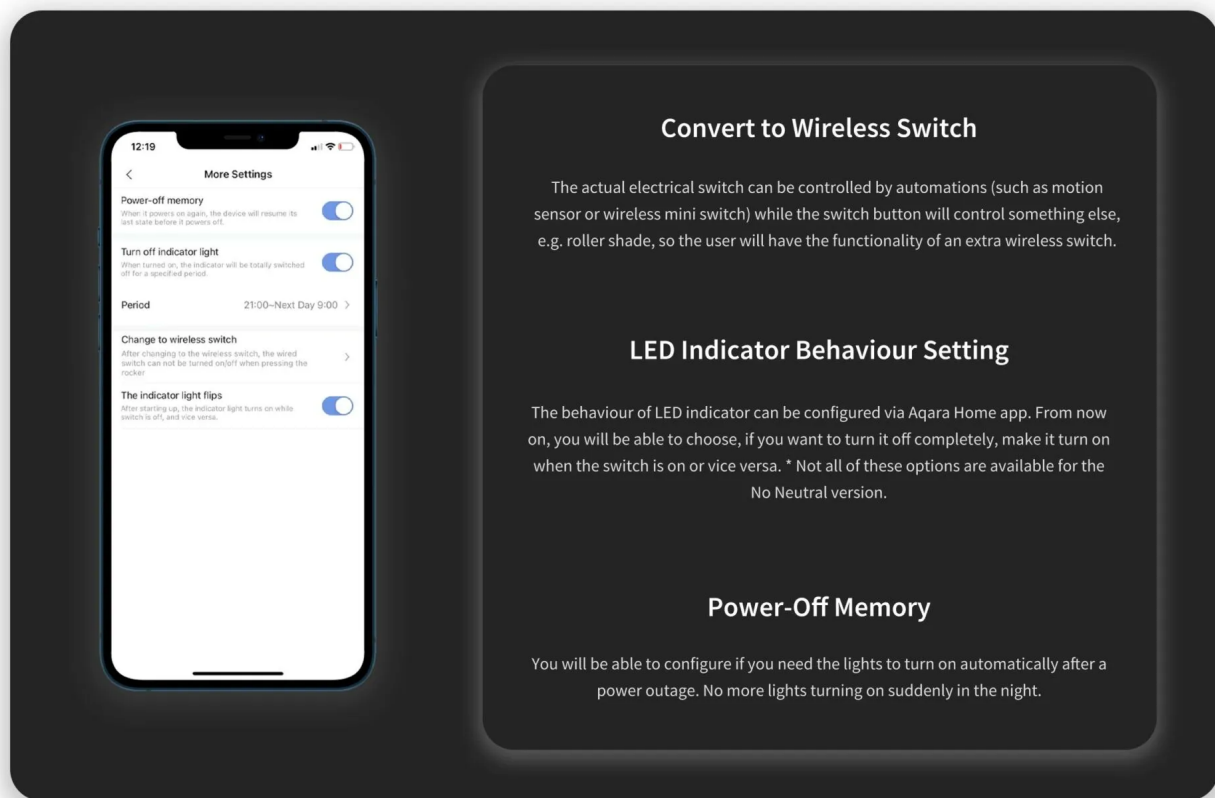

Smart home integration

Expand the functionality of your smart home system with comprehensive compatibility with popular voice assistants such as HomeKit, Alexa, Google Assistant and others. The **Wall Switch H1 EU** easily integrates with **Aqara hubs**, enabling harmonious collaboration with other **smart devices**. This allows users to create advanced automation scenarios, resulting in smarter and more **energy-efficient living**.

Advanced installation options

The **H1 EU** Wall Switch allows a **2-way configuration using the H1 Wireless Switch**, which is an excellent option for upgrading existing manual installations to **smart** ones without the need for additional wiring. It can be mounted on an existing wall box or on any flat surface using the included **adhesive pad**. This flexibility allows you to expand your smart home capabilities, regardless of the aesthetics or functionality of your existing installations.

Security and personalization

Taking care of safety, the **Wall Switch H1 EU** is equipped with an **overheat protection function** to keep the home safe. In addition, it allows configurable control of the **LED indicator** through the **Aqara Home app**, allowing you to customize the behavior of the indicator according to your personal preferences. This allows you to set whether you want the indicator to always be on, off, or to indicate the current state of the switch, giving you more control over its functionality.

Forward-looking and flexible

The **Aqara Wall Switch H1 EU button module** is easy to upgrade or replace. The switch consists of two main parts: the "relay" part and the "button" module. The button module can be easily updated in the future or in case of damage. This feature ensures that **the smart home system** remains up to date with the latest technology and can be adapted for future needs or repairs, making it a wise investment for any homeowner.
