Aqara

Manufacturer: AQARA

Referention number: DNXGFQMMDRMMIO

Product features

Height	36 mm
Width	36 mm
Depth	9 mm
Connectivity technology	Wireless
Quantity	1
Battery voltage	3.3 V
Humidity measurement range	0 - 95%
IFU / User manual	Yes
Material	Acrylonitrile butadiene styrene (ABS)
Operating temperature (T-T)	-10 - 45 °C
Placement	Indoor
Number of batteries supported	1
Power source type	Battery
Product colour	White
Mounting hardware type	Ceiling/Wall
Compatible battery sizes	CR2032
Baby unit batteries included	Yes

Full product description

Vibration sensor Xiaomi Aqara

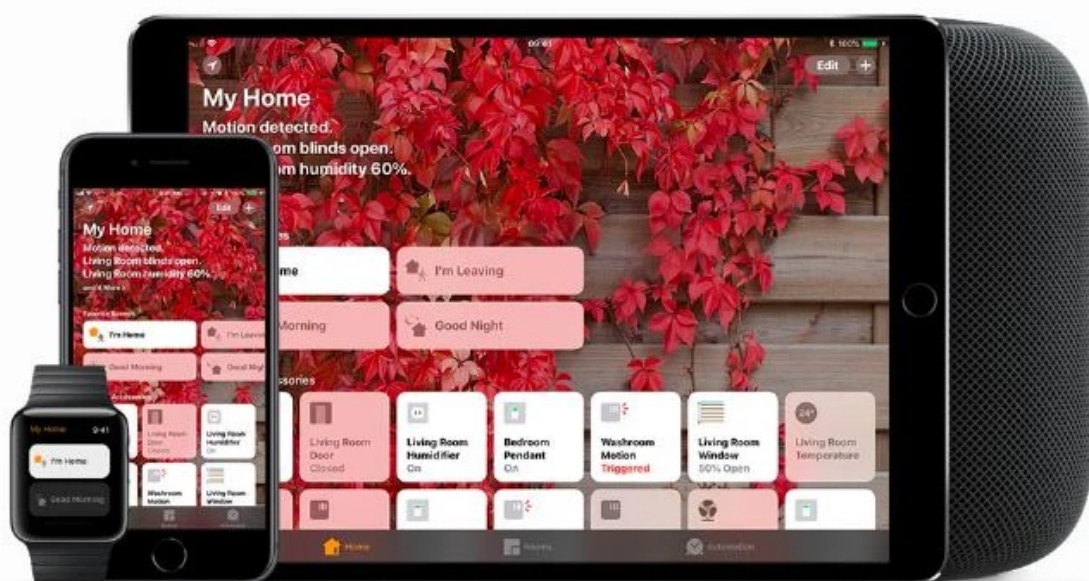

Thanks to its high performance the **intelligent Aqara** vibration sensor is the perfect solution for internal monitoring. The device is equipped with intelligent sensitivity and high quality material, so that the sensor can be placed anywhere according to your needs (e.g. **valuable**

images, drawers and cabinets, balcony doors), while ensuring full security. The vibration sensor is adapted to work with other electrical devices and can be remotely controlled by telephone at any time and anywhere.

Safety notice

When the slightest vibration, tilt or fall is detected, the Aqara vibration sensor will activate the [Aqara HUB](#) to issue an alarm and send a notification to your phone. The vibration sensor will work with other accessories with HomeKit support at home.

Advanced technology

The Aqara vibration sensor is embedded in the **acceleration sensor (Accelerometer)** with extremely high precision. Thanks to the UV-resistant material used, the color does not fade, which will allow for long-term use. The sensor consumes little energy and one battery lasts about 2 years.
