Full product description

Xiaomi Aqara Wall Double Switch H1

The upgraded **Aqara Wall Double Switch H1** smart switch is mounted in place of a standard round outlet. The "**neutral wire**" version of the switch requires a connection to the neutral wire and offers **enhanced functionality**: electricity consumption statistics, status memory and overload protection.

More smart home features

Now it's **really easy to make** all the lighting in your **home smart**. Simply replace conventional switches with Aqara switches and control your lighting remotely using the **Aqara Home app** or with automated scripts. The switch can switch loads up to **8 Amps**.

Main features

- Installation in standard round sockets
- Protection against overheating
- Timer operation
- Works via Zigbee 3.0 protocol
