Full product description

Aqara T1 water leak detector: protect your home from water leak hazards

Detecting any water leaks or flooding, the **Aqara Water Leak Sensor T1** is the first line of defense against potential water damage. It **actively monitors the status of water** leaks, providing immediate **notification via the app** if a leak occurs. Whether it's a small leak or a significant flood, the T1 sensor will help you prevent water damage.

Powerful alert and notification system

The precision of the Aqara T1 water leak sensor is unparalleled. As little as 0.5 mm of water level triggers the **Aqara tubeT1** to trigger a powerful alarm. At the same time, a push notification is sent directly to your phone, ensuring you never miss potentially dangerous events.

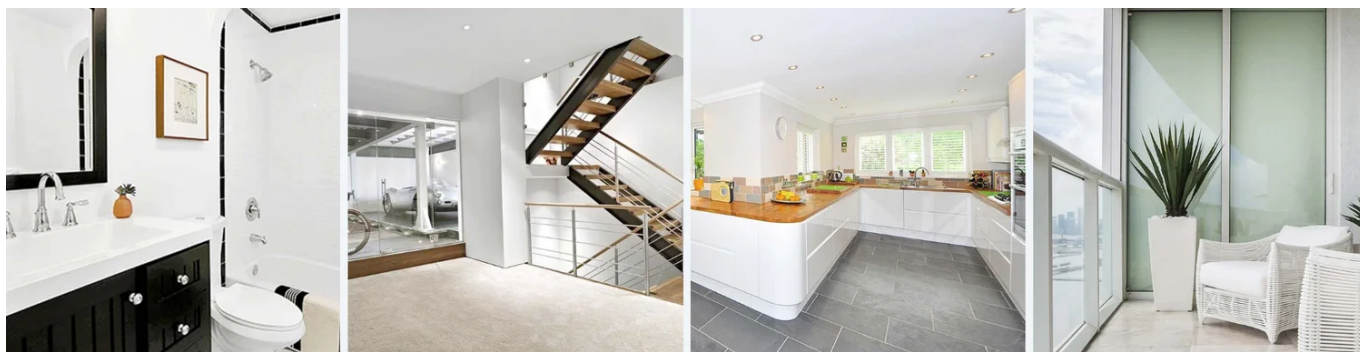

Durable and reliable design

Built with durability in mind, the **Aqara Water Leak Sensor T1** is **IP67** rated, making it both dustproof and waterproof. This ensures that the device remains functional even in wet and dusty conditions. In addition, thanks to its **external anti-UV coating**, it is resistant to discoloration, maintaining its aesthetic appearance for a long time.

Versatile placement and expandability

Thanks to its slim and sleek design, the Aqara T1 water leak detector can be seamlessly placed anywhere in the house. And if you need a wider coverage area? Just connect any wires to the probe's screws to extend its range.

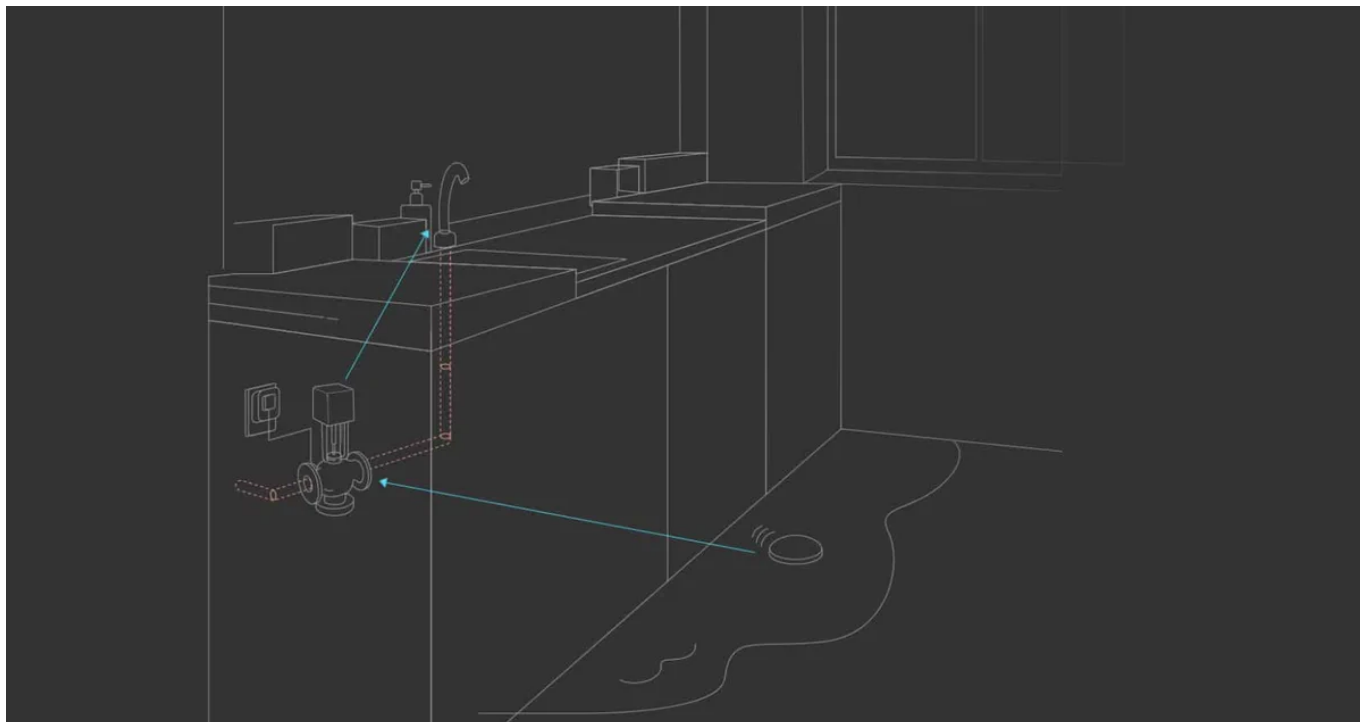

Extensive integration with Smart Home ecosystems

When paired with [Aqara hub](#), the Water Leak Sensor T1 can be used with a variety of third-party platforms. This includes compatibility with **Apple Home** (with critical alerts), native integration with **Samsung SmartThings**, **Yandex Smart Home**, **Alexa**, **Google Home**, **IFTTT** and **Matter**. Immerse yourself in a multitude of smart integrations!

Smart home automation at its best

Imagine detecting a water leak and automatically shutting off the water supply. With Aqara's suite of smart home products, you can configure such automation. For example, when a leak is detected, a sensor can instantly tell the Aqara Smart Plug to close the water valve.

Technological excellence and updates

Energy efficiency is the basis of the T1 water leakage sensor. With regular use, a single battery provides a **lifespan of more than 2 years**. And with the new T1 series, you can enjoy **OTA update** support, ensuring that sensors are always up to date with greater stability and functionality.
