Full product description

Aqara Wireless Mini Switch T1 Smart Switch

Aqara Wireless Mini Switch T1 is a remote-controlled switch with a compact design and low power consumption. **It can be placed or stuck almost anywhere.** With a single press, double press or long press, you can control various smart accessories such as Smart Light and Smart Plug.

Designed to be mounted anywhere

The Aqara Wireless Mini Switch T1 **requires no wiring**. The minimalist design allows it to be placed anywhere or attached to a surface with a sticker.

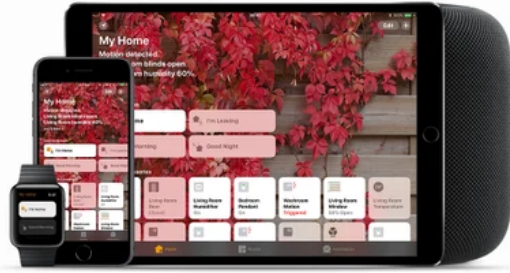

Support for multiple ecosystems

Once paired with the Aqara hub, the sensor can be made available to third-party platforms such as **Apple Home and Matter**. What's more, it can be natively integrated with **Samsung SmartThings and Yandex Smart Home**.

Aqara home automation

The ability to customize different automation scenes allows the switch to be used to control other devices in the Aqara family of smart home products.

Works as a smart doorbell

The **Wireless Mini Switch T1** can be used as a doorbell in conjunction with Aqara hubs equipped with speakers. You can also customize the sound of the doorbell using the Aqara Home app.

Working as an emergency button

The Wireless Mini Switch can also act as a home alarm button. When it is pressed, the Aqara Hub will send a push notification and sound the alarm.

Advanced technology and OTA update

The Aqara Wireless Mini Switch T1 can perform up to 50,000 presses. A fireproof V-0 grade PC panel was used, which provides resistance to high temperatures. Compared to the original Mini Switch, the T1 model has support for OTA updates, which has increased its stability and functionality.
