Full product description

Rear bike light - your safety on the road

Ensure your safety on the bike with **a rear bike light** that provides visibility in any situation. Equipped with **a laser system** and 5 powerful LEDs, this **light** draws lines to increase your visibility, especially in dark conditions. It's **an accessory** that will come in handy for any cyclist concerned about their safety.

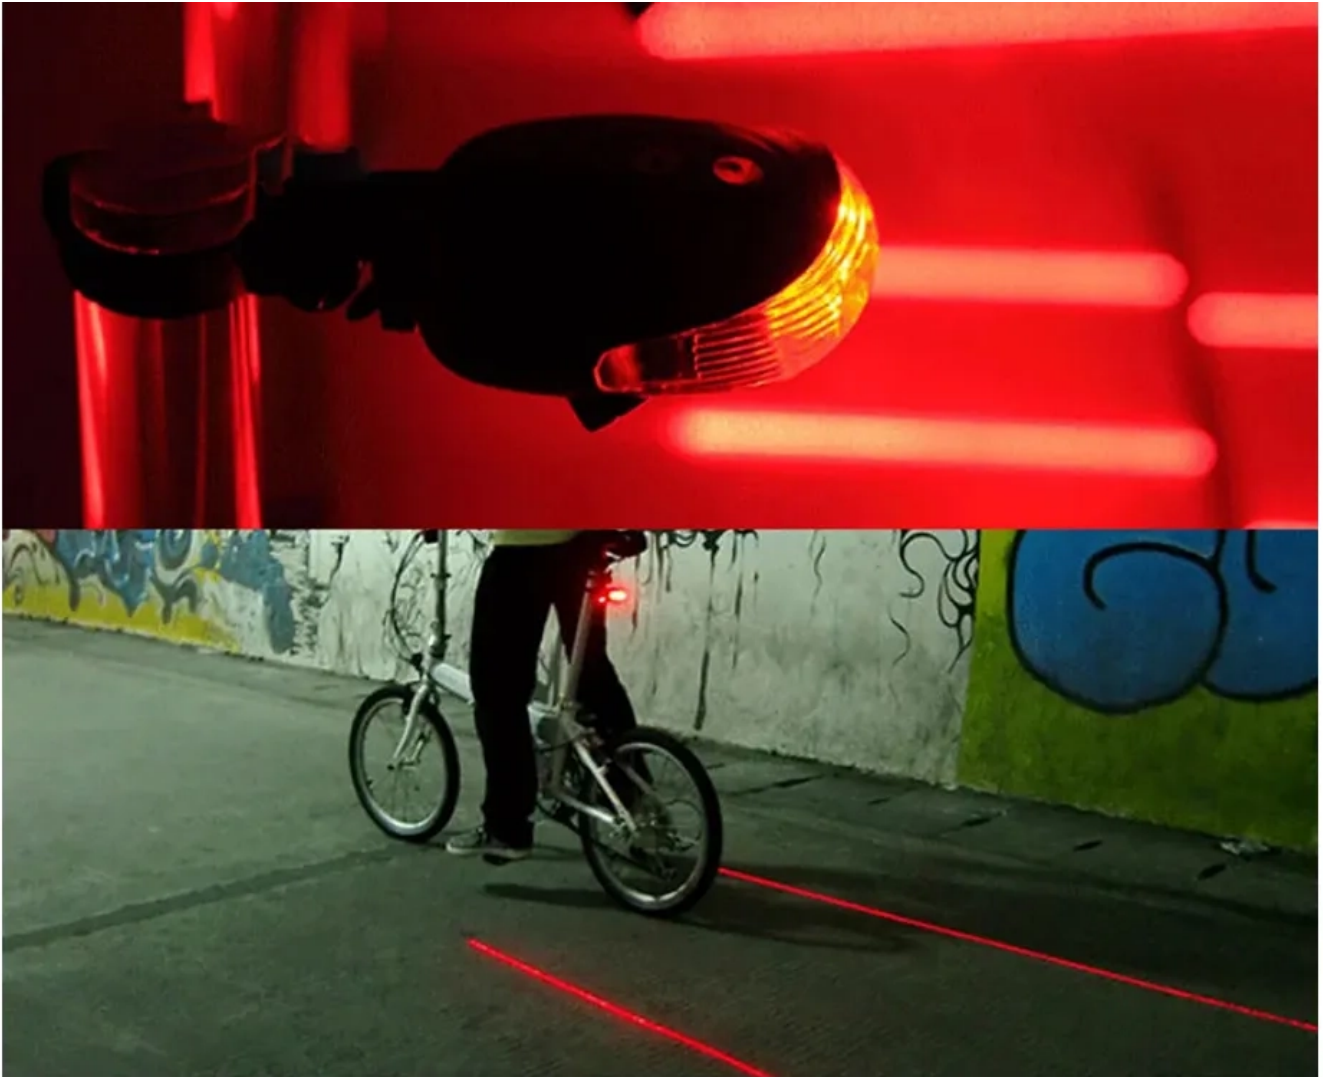

Increased visibility on the road

Using **5 LEDs** and **a laser system**, the **rear bike light** draws lines on the road to improve your visibility and signal other road users where your bike is. The rear light and laser line make you more visible, which in turn ensures **safe riding**, especially after dark. This solution significantly increases your protection on the road.

Weather resistance

The rear bicycle light is designed for use in various weather conditions. It is resistant to **rain**, moisture and changing conditions, so it works all year round, regardless of the weather. So **the lamp** is **safe and reliable**, even during heavy rain or windy days.

Powerful lasers for better protection

The use of **powerful lasers** in this product is another feature that significantly improves the safety of the cyclist. The lasers draw a clear line on the road, which makes it possible for other traffic participants to spot you from a greater distance. **The laser system**, combined with LEDs, ensures **safe riding**, and you get the assurance that your presence on the road is clearly visible.

Easy installation and durability

The rear bicycle light features a simple mounting to the bike's seatpost for **quick and easy** attachment without the need for tools. Thanks to its **shock resistance**, the lamp does not lose its performance even in difficult off-road conditions. **The lamp** is made of high-quality materials, which ensures its durability and robustness for a long time.
