Full product description

Power strip Armac R5

The **Armac R5** surge power strip is an accessory that **protects electrical equipment** from mains surges or power failures. The device helps smooth out mains interference, providing stable power to equipment, as well as reducing high frequency interference from the electrical equipment itself. It is installed as a buffer between the equipment and the connection socket.

Safety is paramount

The **Armac R5 power strip** has been designed to connect up to five euro standard sockets. The maximum load of the device is **2500 W**. The filter is equipped with an on/off switch that **automatically switches off the filter** when the load exceeds the permissible limit. The casing is made of fire-resistant material, so that the device is not exposed to short-term fluctuations in load.

Features of the model

- Equipped with 5 sockets and on/off switch
- Capable of handling loads up to 2500W
- Maximum current is 10A
- Overload and short-circuit protection as well as earth connection are provided for safe use
