Information:

Lightweight and compact 50W plastic welder with temperature adjustment up to 400°C enables quick, durable and precise repairs of a wide range of plastics. Ideal for bumpers, RTV/household appliance housings and other components, it is suitable for both workshop and home use. The ergonomic pistol grip and built-in LED lighting make it easier to work in hard-to-reach and poorly lit areas. The set includes 200 staples of various types, a knife, pliers and a practical carrying case. Compatibility with approx. 98% of plastics ensures versatile use and strong, damage-resistant joints.

Full product description

Versatile plastic welding machine for precise repairs

This lightweight and compact device allows for quick and durable joining of a wide range of plastics. Thanks to **50W power** and **adjustable staple temperature up to 400°C**, it ensures solid, damage-resistant joints, ideal for repairing bumpers, RTV and household appliance housings, and many other components.

Ergonomics and ease of use anywhere

The pistol shape and **built-in LED lighting** guarantee comfortable and precise work, even in poorly lit or hard-to-reach places. The **lightweight design** minimises hand fatigue, which is especially important during longer repairs.

Complete accessory set in a practical case

The set includes as many as **200 staples of various types** (small wave, large wave, external and internal corners), a knife for shaping plastic, and pliers. Everything is packed in a sturdy case that makes transporting and storing the tools easier.

Universal use for a variety of plastics

The device is compatible with **around 98% of plastics available on the market**, making it an indispensable tool for both DIY enthusiasts and professionals involved in repairs in the automotive, household and industrial sectors.

Durability and efficiency guaranteed

The welder guarantees **strong, durable joints resistant to shocks and twisting**, so repaired components retain their properties for a long time. By investing in this set, you get a tool that will meet even demanding tasks.
