Full product description

Bebird EarVision Plus I35R - otoscope with camera for complete ear hygiene

Meet **the Bebird EarVision Plus I35R**, which takes ear hygiene to a new level. Equipped with a **1080p camera**, this camera-enabled otoscope allows for thorough and safe cleaning and real-time monitoring of the inside of the ear. Designed with the whole family in mind, it makes it easy to remove earwax and maintain the health and hygiene of the ear canal.

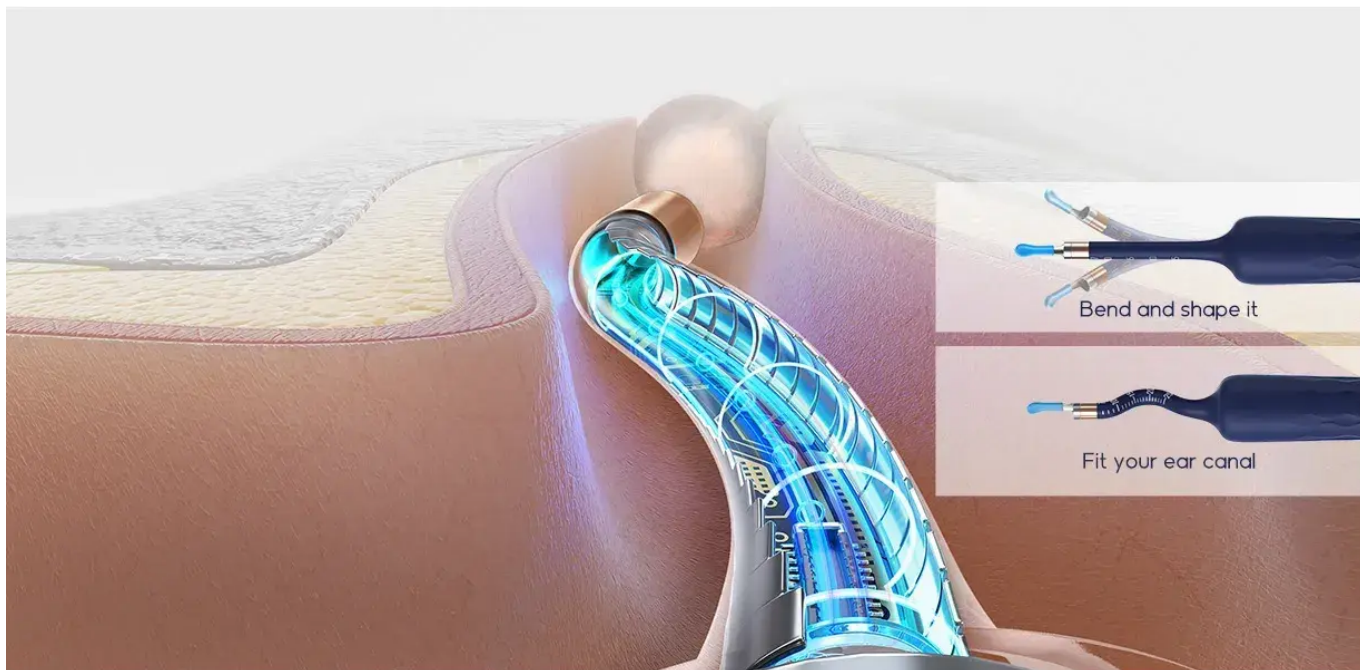

High image quality and precision cleaning

The **Bebird EarVision Plus I35R** features a **1080p camera** that offers exceptional detail when examining the inside of the ear. Thanks to the flexible silicone lens and **precision 3P lens**, the image is extremely clear, making it easier to remove earwax. You can monitor the cleaning process in real time via your smartphone, making ear cleaning safe and accurate.

Versatility and comfort of use

With four different wax removal tips, the **Bebird camera otoscope** will work well for both wet and dry earwax. Whether you need to clean, scrape or gently pick up debris, this kit will meet the needs of all family members. Safety is ensured by a built-in stop that prevents the tool from being inserted too deeply into the ear canal.

Painless Tweezers - gentle and painless cleaning

Special **wax removal tweezers** effectively get rid of stubborn debris, minimizing contact with the walls of the ear canal. This solution works especially well for people with sensitive ears. Manual pressure control allows painless and hygienic cleaning.

Versatility of use and additional features

The Bebird EarVision Plus I35R is not just **an otoscope with an ear-cleaning camera** - it can also be used to examine the nose, throat, scalp or teeth. Thanks to the Wi-Fi function, you can send images and videos to your doctor, saving time on consultations. The built-in system works offline, so your data is safe and not transmitted to the Internet.
