Full product description

Bebird Home 30S: otoscope for comprehensive ear care

The Bebird Home 30S is a state-of-the-art otoscope that allows you to safely and accurately monitor the ear health of the whole family. Equipped with **a high-precision 3.1mm camera and AR technology**, it provides clear images and ease of use. It's the ideal tool for daily ear hygiene, which takes care of the comfort and safety of your loved ones.

Accurate images thanks to advanced camera

The 10 million-pixel camera, backed by a **DSP chip**, guarantees exceptional image quality. **The small 3.1mm diameter** allows for safe and comfortable viewing of the ear canal in real time. **The camera's anti-shock technology and flexible design** ensure a perfect fit to the ear, even in children, guaranteeing precision and comfort.

Comprehensive ear care at home

Bebird Home 30S is not just an otoscope, it is a complete tool for taking care of ear hygiene at home. Interchangeable medical-grade **silicone tips** and a **UV sterilizer** ensure maximum hygiene and safety. **The waterproof design and special plugs for children** make the otoscope ideal for the whole family. Now you can take care of the cleanliness of your loved ones' ears without having to visit a specialist.

Effective earwax removal

With the included **precision tweezers**, the Bebird Home 30S makes it easy and safe to remove earwax and other debris from the ear canal. It comes with **interchangeable tips**, tailored to remove both dry and oily earwax for complete personalization and effectiveness.

Telemedicine at your fingertips

Connect the Bebird Home 30S to your home Wi-Fi network and enjoy the convenience of ear monitoring at home. **Share photos and videos with specialists**, get expert advice and safely remove foreign bodies from the ear canal. It's the perfect solution to help you take care of your ear health while saving time and avoiding queues.

Mobile app for even more possibilities

Download the dedicated **Bebird app for iOS or Android** and discover even more features. Backed by a modern IoT healthcare system, the app allows easy access to settings, image sharing and contacting a specialist. In addition, the app offers **4 modes**: Clean, Lover, Child and Senior, which can be customized for each user.
