Full product description

No more guesswork! Clean and healthy ears with a smart visual ear cleaner!

Tired of uncertainty when cleaning your ears? **Traditional methods are often ineffective** and even dangerous. The smart visual **ear otoscope with camera** combines advanced technology and safety, allowing you to **see the inside of your ear canal in high resolution**. It makes ear cleaning precise, safe and extremely effective, providing you with comfort and confidence in perfect hygiene.

See for yourself - High-resolution otoscope for perfect clarity

The Bebird X0 cleaner is more than just a simple stick. With **a miniature camera**, sending **real-time images** to your smartphone screen, you can literally look inside your ear. No more guessing whether the wax has been removed! **Now you can see exactly what you're doing**, allowing for precise and effective removal. **The image is sharp and clear**, so no contaminants, even those hidden deep in the ear canal, will escape your attention. This not only increases cleaning efficiency, but also **minimizes the risk of accidental damage to** delicate ear structures. Forget about uncertainty and acting "blindly" - with the X0 otoscope you have full control and confidence that your ears are clean and healthy.

Dzięki endoskopowi wysokiej rozdzielczości woskowina nie ma gdzie się ukryć

Image stabilization - Intelligent gyroscope for comfort and precision

It is difficult to maintain a steady hand during precision operations, especially in such a delicate area as the ear. That's why the cleaner is equipped with **an advanced gyroscope**. This technology stabilizes the image transmitted from the endoscope, **eliminating vibrations and providing a smooth and clear view of the inside of the ear**, even with the slightest hand movements. This makes cleaning extremely comfortable and precise. You no longer have to worry about blurry images or loss of control. **The gyroscope acts like a built-in stabilizer**, so you can focus on removing earwax accurately and safely, without worrying about unwanted movements or risking discomfort. This is the perfect solution for those who value precision and comfort when taking care of their ear hygiene.

Safety first - Intelligent temperature control and LEDs

Your health and safety are paramount. That's why the smart Bebird X0 is equipped with **intelligent temperature control**. The device maintains a constant, safe temperature, preventing overheating and discomfort during use. In addition, the **otoscope is equipped with 6 cold LEDs** that illuminate the ear canal, providing **excellent visibility without the risk of burns or irritation** that could occur with traditional light sources. The cold LEDs guarantee a bright and safe light, perfectly illuminating even the deep parts of the ear, enabling thorough and safe cleaning even at home.

6 zimnych diod LED chroni zdrowie Twoich uszu

Wyraźna widoczność nawet przy samodzielnym użytkowaniu

Gentleness and precision - a mini-ear sponge for everyone

Every ear canal is different, and gentleness is key. The ear canal cleaner is equipped with a **miniature ear spoon with a diameter of just 3.5 mm**. This precisely contoured piece is designed to **gently and effectively remove earwax even from narrow ear canals**. Made of safe and pleasant to the touch materials, the spoon is not only **effective, but also comfortable to use**. It makes ear cleaning less invasive and more pleasant, minimizing the risk of irritation and discomfort. Regardless of your ear canal structure, the ultra-small spoon will provide you with safe and effective cleaning, tailored to your individual needs.

Simple operation and convenience - Intuitive solutions for your convenience

Using the smart ear otoscope is extremely **simple and intuitive**. At the touch of a button, the device turns on and connects to **a dedicated smartphone app** via **wide-area Wi-Fi**. The app provides **smooth and clear images from the endoscopic camera in real time**, enabling precise ear cleaning. Charging the device is also very convenient thanks to **the universal Type-C connector**. The cleaner's compact and lightweight design (it weighs just 11g) makes it ideal for everyday use and easy to store or take on the go. Its ergonomic shape makes it **fit perfectly in the hand**, providing a comfortable and secure grip during use.

Package contents - Everything you need to get started

The smart visual ear cleaner comes with everything you need to start using the device right away:

- **Smart Visual Ear Cleaner:** The main component of the kit - a high-tech cleaner with a built-in camera and gyroscope.
- **User manual:** Detailed step-by-step instructions that guide you through the process of setting up and using the device.
- **Accessory Storage Bin:** A practical storage bin for storing interchangeable tips and other accessories, keeping things organized and providing easy access to the items you need.
- **Type-C charging cable:** Universal USB-C cable for fast and convenient charging of your device.
- **Interchangeable silicone tips (4 pieces):** A set of soft and safe silicone tips in different sizes for customization and preference.
