Full product description

BETA FPV 1506 3000KV Brushless Motor - power and precision for your drone

The **BETA FPV 1506 3000KV** is a brushless motor that offers **high power and efficiency**, resulting in better control and flight stability. With its **light weight and robust design**, it's a great choice for FPV pilots who want proven performance.

Lightweight design for greater maneuverability

The BETA FPV 1506 **weighs only 14g**, which preserves flight dynamics and improves the drone's maneuverability. The low weight also affects energy efficiency, which can translate into longer flight time.
