Full product description

BETAFPV 6-Port 1S Charger - fast and convenient charging

The BETAFPV 6-Port 1S Charger allows you to charge as many as **six batteries** simultaneously, significantly speeding up flight preparation. With its compact design and intuitive operation, it is a practical solution for FPV drone pilots who value convenience and efficiency.

Charging multiple batteries simultaneously

Forget about having to connect each battery separately. **The BETA FPV 6-Port 1S Charger** allows you to charge six batteries simultaneously, saving you time and getting you back to flying faster. Each port is independent, so **you can charge different batteries with different charge levels** without worrying about their condition.
