Full product description

BetaFPV 7x16mm 19000KV Brush Motors: Power for Micro-Whoops.

Measuring 7x16mm and boasting an impressive 19000KV speed, these brush motors are a significant upgrade for your micro-whoop, transforming it into a true "monster" of power. They are ideal for BetaFPV Beta65S V3 and V4 drone frames and Eachine E011 (not compatible with standard Whoop frames). Each motor weighs just 2.95g (including cables and connector) and features the popular JST 1.25mm 2P connector, making them suitable for connecting to flight controllers such as those from Blade Inductrix or Tiny Whoop. The motors offer high performance at 3.7V, providing dynamic flight and excellent performance.
