Information:

The set of 2 BetaFPV 650mAh 1S 60C BT2.0 batteries for the Aquila16 drone provides high performance and reliability during flight. The modular design improves aerodynamics and increases the drone's resistance to damage in collisions, which is especially useful during training and intensive use. The 650 mAh version with 60C discharge offers strong acceleration, greater agility and dynamic control, while compatibility with the Aquila16 guarantees a perfect fit and stable operation.

Full product description

Aquila16 2-pack drone battery kit

The **BetaFPV 650mAh 1S 60C BT2.0 (Aquila16)** battery was designed for the Aquila16 and features a modular design. Such a solution not only improves the aerodynamics of the drone, but also significantly increases its durability in case of possible collisions. This is crucial to ensure the durability of the equipment, especially in an environment of intensive learning and use.

Performance and Options Available to the User

Two options of this battery are available to suit different flying styles. The **1100 mAh** version enables the Aquila16 quadcopter to achieve an impressive flight time of up to 8 minutes, providing a continuous and engaging training session without the need for frequent recharging. Meanwhile, for pilots who prioritize agility and speed, a **650 mAh** version with a high discharge rate of 60C is dedicated. This option delivers more power, allowing you to push the limits of speed and maneuverability. Both versions are designed to enhance the flying experience through long-lasting performance or increased dynamics.
