Full product description

BetaFPV C01 Camera with Shield for Tiny Whoop

The BetaFPV C01 camera is a new lightweight (1.4g) component dedicated to whoop drones. Equipped with a 1/4" CMOS sensor with 800TVL resolution and Global WDR, it provides excellent FPV images. It features a wide 160-degree field of view thanks to a 2.1mm (M8) lens and operates in NTSC. The camera can be directly connected to the M01 AIO video transmitter from BetaFPV (V2.1 pin version). It also comes with a matching, injection-molded cover (canopy) made of durable ABS material that fits both 65mm and 75mm drones. The camera operates at a power supply voltage of 3-5.5V, offering great image quality with low power consumption.
