Information:

The FPV Camera + VTX Module for BetaFPV Cetus is an easy-to-install kit that adds first-person view functionality to the drone and can also be used as a spare part for the Cetus FPV. The pre-build design and plug-n-play connector make installation quick and solder-free. The package includes the camera and VTX module, a mounting component, a power cable and four screws, so you have everything needed for a smooth installation and a quick return to flying.

Full product description

FPV module (VTX camera) for BetaFPV Cetus

This camera and video transmitter (VTX) module is designed to enhance BetaFPV Cetus kits with FPV (first-person view) functionality, and is also a replacement part for the Cetus FPV drone. The Cetus Lite Camera and VTX module is ready to assemble ("pre-build"), and is extremely easy to install thanks to a plug-n-play connector that eliminates the need for soldering. The package includes the camera and VTX module, mounting hardware, power cable and four screws, everything you need for a quick and hassle-free installation.
