Full product description

BETAFPV CETUS LITE FPV KIT - ideal for those who want to start their adventure with FPV drones.

This complete kit is designed with beginners in mind, offering everything you need to start flying - from the drone to the transmitter to the FPV goggles. With its simplicity and reliability, the Cetus Lite kit is a great choice for anyone who wants to quickly master the art of drone flying.

Stable hovering - height maintenance function

The Cetus Lite FPV Kit is **equipped with an altitude hold function**, which makes flying significantly easier. This allows the drone to hover stably at a preset altitude, which is extremely useful for novice operators. This feature makes controlling the drone simpler and more intuitive.

Stable Height Hovers

Make Flying Experience All the Better

Protection priority - frame design with propeller guard

The Cetus Lite drone **has a special frame with a propeller guard** that provides additional protection during flight. This keeps both the drone and the surrounding area safe, even in the event of a collision. This is an excellent solution that makes this drone a safe miniature toy for children and those who are just starting out in FPV.

Prioritizing Protections

Frame with Propeller Guard

Ultralight design - small and portable

The BETA FPV Cetus Lite is a drone that **weighs just 36g**, making it **extremely portable and easy to carry**. Thanks to its ultralight design, you can take it anywhere with you and enjoy flying anywhere. This is the perfect drone for those who appreciate mobility and the ability to fly in different locations.

Ultralight Weight, Small and Portable

Speed modes - control from slow to fast flight

The Cetus Lite FPV Kit **offers two speed modes**, allowing a smooth transition from slow, precise flight to faster maneuvers. This is ideal for beginners who want to gradually develop their piloting skills. With this feature, anyone can feel confident with full control over the speed of their drone.
