Price: **1,299.00 zł** gross / 1,056.10 zł net

Manufacturer: BETA FPV

Referention number: DNXGIPMOIRMMPO

Information:

BETA FPV Cetus X Kit is a complete FPV set for beginners and more advanced pilots, offering stable and intuitive flying thanks to the position-hold mode. Powerful brushless 1103 11000KV motors provide excellent agility, speed and precision, while the lightweight design makes dynamic manoeuvres and tricks easier. The set includes VR03 FPV goggles with DVR function, allowing you not only to immerse yourself in the flight, but also to record the best shots. The improved C04 FPV camera and VTX M04 25-400 mW transmitter guarantee a stable image over longer distances, and the adjustable camera angle lets you tailor the view to your flying style.

Full product description

Stability at your fingertips

The BETA FPV Cetus X FPV Kit is equipped with **an advanced position hold mode**, which enables easy and stable flying even in difficult conditions. With this feature, the drone automatically maintains its position, making flying simpler and more intuitive. It's ideal for beginner pilots who are just learning to control their drone, as well as experienced users who need reliability.

Powerful drive train

The Cetus X FPV Kit is equipped with 1103 11000KV brushless motors, which provide enough power for dynamic and precise flying. They give the drone **unparalleled maneuverability and speed**, resulting in an amazing flying experience. These motors, combined with the drone's lightweight design, allow it to maneuver smoothly and perform advanced tricks.

Sufficient Power, Breathtaking in a Moment

Start recording exciting flights

The Cetus X FPV Kit comes with VR03 FPV goggles that provide full immersion FPV flight. These advanced goggles not only allow you to enjoy real-time flight, but also record your experience with the DVR function. Now **you can capture and preserve every shot**, making every flying session even more exciting.

New VR03 Goggles Included in Cetus X FPV Kit

Lightweight and durable with better video transmission

The BETA FPV Cetus X drone is equipped with an upgraded C04 FPV and VTX M04 camera with 25 to 400mW of power, providing **longer video transmission without any loss** in quality. Thanks to the drone's lightweight design and efficient transmission system, you can enjoy stable video over longer distances for a better flying experience. The camera also allows you to **adjust the angle** so you can customize your perspective.

Lightweight, But Longer Video Transmission
