Full product description

Pavo20 Pro Brushless Whoop Quadcopter - Unparalleled Cinewhoop Experience

The **Pavo20 Pro** is a compact, high-performance **2.2" cinewhoop** that is redefining the way DJI pilots engage in FPV flying. Weighing less than **150g**, this lightweight giant offers expanded compatibility with the latest **DJI O3** and **DJI O4 Air Unit Pro**, taking the cinematic and freestyle experience to a whole new level. With an exceptional **flight time of up to 6'40"**, this drone combines agility, power and cinematic fluidity, making it an ideal choice for both experienced and novice pilots.

Lightweight Performance and Powerful Propulsion System

Equipped with **LAVA 1104 | 7200KV Brushless Motors** and **Gemfan 2218 3-blade propellers**, co-developed with **Gemfan**, the **Pavo20 Pro** provides exceptional thrust that makes it ideal for freestyle maneuvers. **The aerodynamic frame** increases thrust **by 8-11%**, and the optimized design ensures stability and performance in flight. Together, these features create a drone that is fast, responsive and can deliver smooth, cinematic shots even during the most aggressive movements.

HD VTX Modular Holder System

Pavo20 Pro offers a **modular HD VTX mount system** that provides seamless integration with **DJI O3** and **DJI O4 Air Units**, as well as systems such as **Caddx Vista** and **RunCam Link**. With a simple **handle swap**, you can seamlessly switch between the **O3** and **O4 Pro** versions without the need for frame modifications. The system provides stable, clear images and high signal quality, eliminating vibrations and interference.

Cinematic Stability and Smoothness of the Picture

With **rubber dampers** and an **injection-molded HD VTX mount**, the **Pavo20 Pro** eliminates shake and vibration, offering **jello-free videos** even during the most demanding maneuvers. Whether you're shooting wide-angle shots with the **DJI O3/O4 Pro** cameras, the setup guarantees cinematic stability, ensuring that every shot is smooth and distortion-free.

Extended Flight Time and Power

With its **LAVA 3S 550mAh 75C** battery, the **Pavo20 Pro** offers a **flight time of up to 6'40"**. This exceptional flight time, combined with a lightweight design, allows for long sessions of immersive flying without the need for frequent recharging. Plus, with an **unlimited height battery slot** and **XT30 connector**, you have complete freedom to choose the battery that best suits your needs.

Versatility and Personalization

The **Pavo20 Pro** offers a range of customization options, including the ability to apply **ND filters** to both the **O3** and **O4 Pro** cameras, ensuring perfect illumination regardless of lighting conditions. The **Pavo Series COB LED strip** improves visibility and safety during night flights, while the **Pavo20 Pro NightFire** version with dynamic RGB LED effects allows you to create an unforgettable night flying experience.
