Information:

Black Forest is a beige Brazilian chair hammock 100 × 130 cm that provides a comfortable place to relax at home, on the balcony or on a covered terrace. The chair-like form of the hammock allows you to adopt a relaxed position while reading, resting or using a tablet, and the gentle rocking encourages relaxation. The wooden bar keeps the spread-out shape, while the braided ropes, knots and decorative tassels give it a decorative, natural character. The light colour scheme perfectly suits boho and Scandinavian-style interiors, as well as arrangements with wood and plants.

Product features

Full product description

Black Forest - beige Brazilian chair 100 × 130 cm

The Black Forest hanging chair creates a comfortable space for relaxing at home, on the balcony or on a covered terrace. The beige colour scheme blends easily with wood, natural accessories and green plants. The 100 × 130 cm dimensions mean the model offers space for comfortable sitting and relaxation.

Comfortable position while resting

The chair-like shape of the hammock allows you to adopt a relaxed position while reading, using a tablet or enjoying a quiet rest. The spacious seat surrounds the user, and the suspended design encourages gentle swaying. The model can become part of a home relaxation zone or a place intended for peaceful leisure time.

Wooden bar and woven ropes

The wooden bar holds the ropes on both sides of the seat and helps maintain the chair's spread-out shape. The visible weaves and knots emphasise the character of the design, while the decorative tassels give the whole piece a stylish look. The natural colour scheme works well in interiors inspired by boho and Scandinavian styles.

Relaxation zone in the home interior

The Black Forest Brazilian chair can be used as an additional resting place in the living room, bedroom or lounge. The beige fabric and wooden structural element complement bright interiors and accessories made from natural materials. The suspended form does not take up the space typical of a chair standing on the floor.

Relaxation on the terrace or veranda

The hanging chair hammock will also work well on a covered terrace, veranda or balcony equipped with a suitable place for hanging. It allows you to create a nook where you can relax with a drink, a book or music. The light colour of the seat looks great surrounded by wood and garden greenery.

Functional decoration for the space

Black Forest combines the function of a hanging seat with a decorative form. Decorative fringes, light fabric and a wooden bar bring a light, cosy character to the arrangement. The chair can serve as a place for reading, a short break or peaceful rest after a long day.
