Information:

The Black Forest watering can with a capacity of 10 litres is a lightweight, convenient and durable tool for watering the garden, balcony and terrace. Its oval shape and ergonomic handle ensure comfortable use, while the strainer enables even and precise watering of plants. Made from UV- and frost-resistant plastic, it does not fade, does not crack and performs well all year round. Its large capacity reduces the need for frequent refilling, and the handy design makes it easy to carry and store.

Full product description

Ensure efficient watering in your garden

Black Forest watering can is a practical tool that will help you effectively water your plants in the garden, on the balcony or terrace. With a **capacity of 10 liters**, you can water larger garden areas without the need for frequent filling. **The oval shape** and plastic material make it lightweight, comfortable to use and durable for many years.

Weather resistance

The watering can is made of **plastic**, which is resistant to **UV rays** and will not crack when exposed to frost. As a result, even after prolonged outdoor use, **the watering can will not fade** or lose its functionality. It's a **durable solution** that's ideal for all seasons and doesn't need to be replaced often.

Lightweight and comfortable to use

Despite its large **capacity of 10 liters**, the watering can is extremely lightweight and handy. The ergonomic handle makes it easy to **carry the full watering can** and allows for comfortable watering, even when filled with water. **The comfort of use** makes it a great choice for larger gardens, but also for **everyday use** in smaller spaces like a balcony.

Precise watering thanks to the strainer

The strainer in the watering can allows you to distribute the water evenly, which makes watering your plants more **precise and efficient**. This **avoids overwatering** plants and spilling water beyond the area you want to water. This is a practical solution that improves the **accuracy and efficiency of watering**.

Durability and convenient storage

The watering can is made of **plastic material** that is durable and resistant to mechanical damage. In addition, thanks to its composed handle and easy structure, it can be easily stored and transported. Its design allows for **space saving and convenient storage**, which is important, especially in smaller gardens.
