Information:

The Black Forest 2 in 1 garden lounger is a practical, reclining piece of outdoor furniture that can be used as an armchair with footrest or in a comfortable lying position. Smooth adjustment, a shaped backrest, an integrated footrest and position lock ensure comfort while reading, sunbathing and relaxing. The breathable seat, armrests and adjustable headrest increase ease of use. The foldable design makes transport and storage easier, while the rust-resistant frame and water- and sun-resistant material make the lounger ideal for the garden, terrace, balcony or trips away. Maximum load: 120 kg.

Full product description

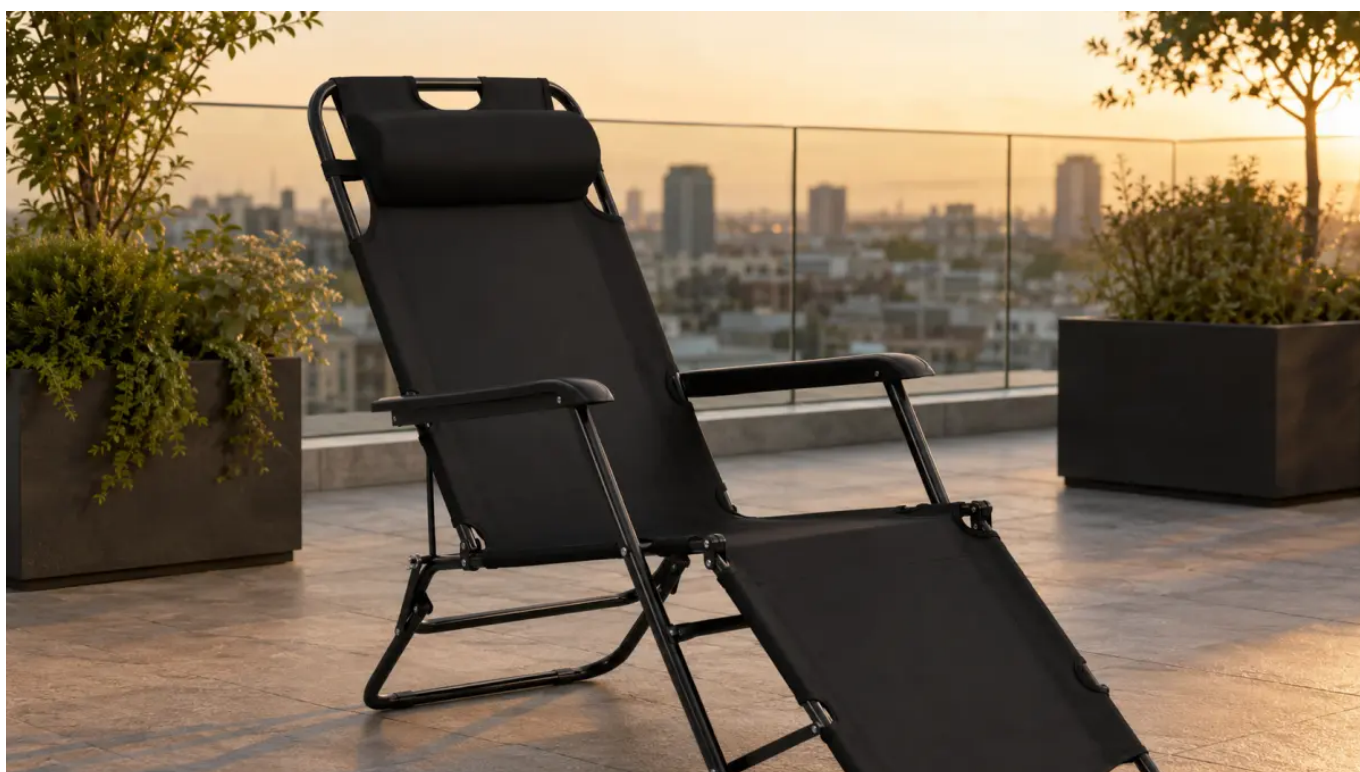

Black Forest 2-in-1 garden lounger

Black Forest is a reclining garden lounger that can serve as an armchair with a footrest or as a place to relax in a lying position. The adjustable position lets you set it for reading, sunbathing or relaxing in the fresh air.

Adjustable relaxation position

The design allows a smooth transition from a seated to a lying position. The contoured backrest and integrated footrest help position the body comfortably, while the lock prevents accidental changes to the selected setting.

Breathable seat and armrests

The breathable seat material supports relaxation on warm days. The armrests provide support for the arms, making the lounger ideal for longer periods of relaxation on a balcony, terrace or in the garden.

Foldable design for easy transport

The lounge can be folded quickly, helping to reduce the amount of space needed for storage and transport. This design makes it easy to take on camping trips, to an allotment or on holiday.

Frame designed for outdoor use

The stable frame is rust-resistant, while the seat material is resistant to water and sunlight. The maximum permitted load of the lounge is 120 kg.

Adjustable headrest for greater comfort

The lounge is equipped with an adjustable headrest that helps support the head and neck during relaxation. The black colour scheme suits various garden, terrace, balcony and poolside arrangements.
