Information:

A durable side parasol with an elegant, modern design, ideal for the garden, terrace and balcony. A solid steel frame with an anthracite powder-coated finish protects against corrosion and ensures stability, while the cross-shaped base increases safety. The large canopy made of weather-resistant fabric effectively protects against sun, rain, wind and UV radiation, does not fade and is easy to clean. Multi-position height and rotation adjustment makes it easy to tailor the shade to your needs, and the practical crank handle allows for quick opening and closing.

Product features

Canopy material	Polyester
Shape	Hexagon
Pole material	Aluminum
Product colour	Beige
Foldable	Yes
Canopy ribs material	Steel
Coloration	Monochromatic
Type	Cantilever patio umbrella

Full product description

Durable Construction and Comfort of Use

This side umbrella combines aesthetic design with high functionality, fitting perfectly into the design of any outdoor space. Its stability is ensured by a sturdy steel frame, covered with durable powder paint in an elegant anthracite color. Such a finish effectively protects the structure from corrosion, guaranteeing long-term use. Effective protection from the sun is provided by a canopy made of high-quality polyester

of 180 gr/m². In addition, thanks to the multi-position adjustment system, the positioning of the umbrella can be easily adjusted to provide an optimal shade zone throughout the day.

Complete Set and Safety

The umbrella set has been thoughtfully designed for comfortable and safe use. The solidity of the structure is guaranteed by a steel cross base, which requires loading with four standard stoneware plates (available in most home improvement stores) to ensure full stability. Daily operation of the umbrella is extremely easy thanks to a special crank, which allows quick and effortless unfolding and folding of the canopy.
