Full product description

Precision cutting and convenient gardening work

The straight pruner is a tool that **provides precise cutting**, allowing efficient care of plants. **Sharp hardened steel blade** allows you to quickly and efficiently cut branches, shoots and flowers, which greatly improves garden work. **Garden shears spring mechanism** makes it easier to operate the secateurs, reducing the effort required for cutting.

Sharp blade for precise cuts

The pruner **has a blade made of hardened steel**, which effectively cuts both thin shoots and thicker branches. Precise cutting preserves the health of plants and accelerates their regeneration. The blade **does not dull quickly**, which makes the secateurs ready for long-term work.

Spring mechanism for easy cutting

Thanks to **the spring mechanism**, the pruner opens automatically after each cut, which reduces hand fatigue. This mechanism **improves the cutting of thick branches** with little effort. Garden shears spring mechanism allows you to work smoothly and comfortably for a long time.

Ergonomic handle for working comfort

The pruner is equipped with a **non-slip handle**, which provides stability and comfort when pruning plants. The handle fits well in the hand, making **gardening more comfortable**. The straight pruner will work well for both amateurs and professional gardening.

Versatile in use

Secateurs allow you to trim shrubs, flowers, herbs and small branches of trees. It is a **useful tool for shaping ornamental plants**, tending the garden and removing dry and unhealthy shoots. **Precise pruning** helps keep plants in good shape for a long time.
