Information:

The Black Forest double swing is the ideal solution for shared play for two children in the garden, on an allotment or in the yard. The stable A-shaped steel frame provides a solid base, and the two separate, shaped plastic seats allow each child to swing at their own pace. The swing is designed for children aged 3-8 years, supports up to 50 kg per seat, and the four included ground anchors help to stabilise the structure securely. It is a great way to enjoy outdoor activity and spend time together.

Full product description

Double swing for shared fun

The Black Forest frame swing has been fitted with two separate seats, allowing two children to play at the same time. It is an interesting way to spend time actively in the garden, at the allotment or in the home yard.

Steel A-shaped construction

The steel frame creates a stable base for the entire structure. The splayed legs help distribute the load evenly, and the blue-and-yellow colour scheme blends well with a space designed for children's play.

Two separate seats

The swing has two contoured seats made of plastic. The independent suspension of each one allows children to swing at their own pace and helps maintain freedom during play.

Outdoor activity

Regular use of the swing encourages children to move and spend time together outdoors. The model is intended for children aged 3 to 8 years, and the maximum load for each seat is 50 kg.

Anchors helping to stabilise the structure

The set includes four ground anchors, which help secure the frame properly in the ground. The swing is intended for private outdoor use, and children should use it under the direct supervision of an adult.

Dimensions suited to two children

The structure measures 248 × 187 × 185 cm and offers a maximum total load of 100 kg. The appropriate spacing between the seats gives children the room they need to swing freely.
