Full product description

Effective plant irrigation

The **10m garden drip sprinkler hose** is a practical solution for anyone who wants to **water plants** effectively and save water. The drip system delivers water **directly to the roots**, minimizing waste and providing optimal conditions for plant growth. **The flexible design** allows easy placement of the hose along flowerbeds, flowerbeds and vegetable gardens.

Water saving and efficient watering

The drip sprinkler system allows you to **precisely water your plants**, minimizing water loss. **Watering is done slowly**, allowing the soil to better absorb moisture. The garden hose is perfect for vegetables, ornamental shrubs and lawns.

Flexible and comfortable to use

The hose is **lightweight and flexible**, making it easy to lay in the garden. It can be **adjusted to any surface**, allowing watering both in greenhouses, on balconies and in home gardens. **Resistance to weather conditions** ensures its long-term use.

Versatile use in the garden

With standard quick-connect couplings, the garden hose fits 1/2" and 3/4" irrigation systems. It can be connected to a variety of garden systems, making **it a practical solution for watering the lawn, flowerbeds and vegetable gardens.**

Pressure and damage resistance

The hose is made of **durable PVC material**, resistant to UV rays and temperature changes. It can be used at pressures of **up to 3 bar**, ensuring a smooth flow of water. The garden hose can be used for many seasons, making it an economical choice for any gardener.
