Full product description

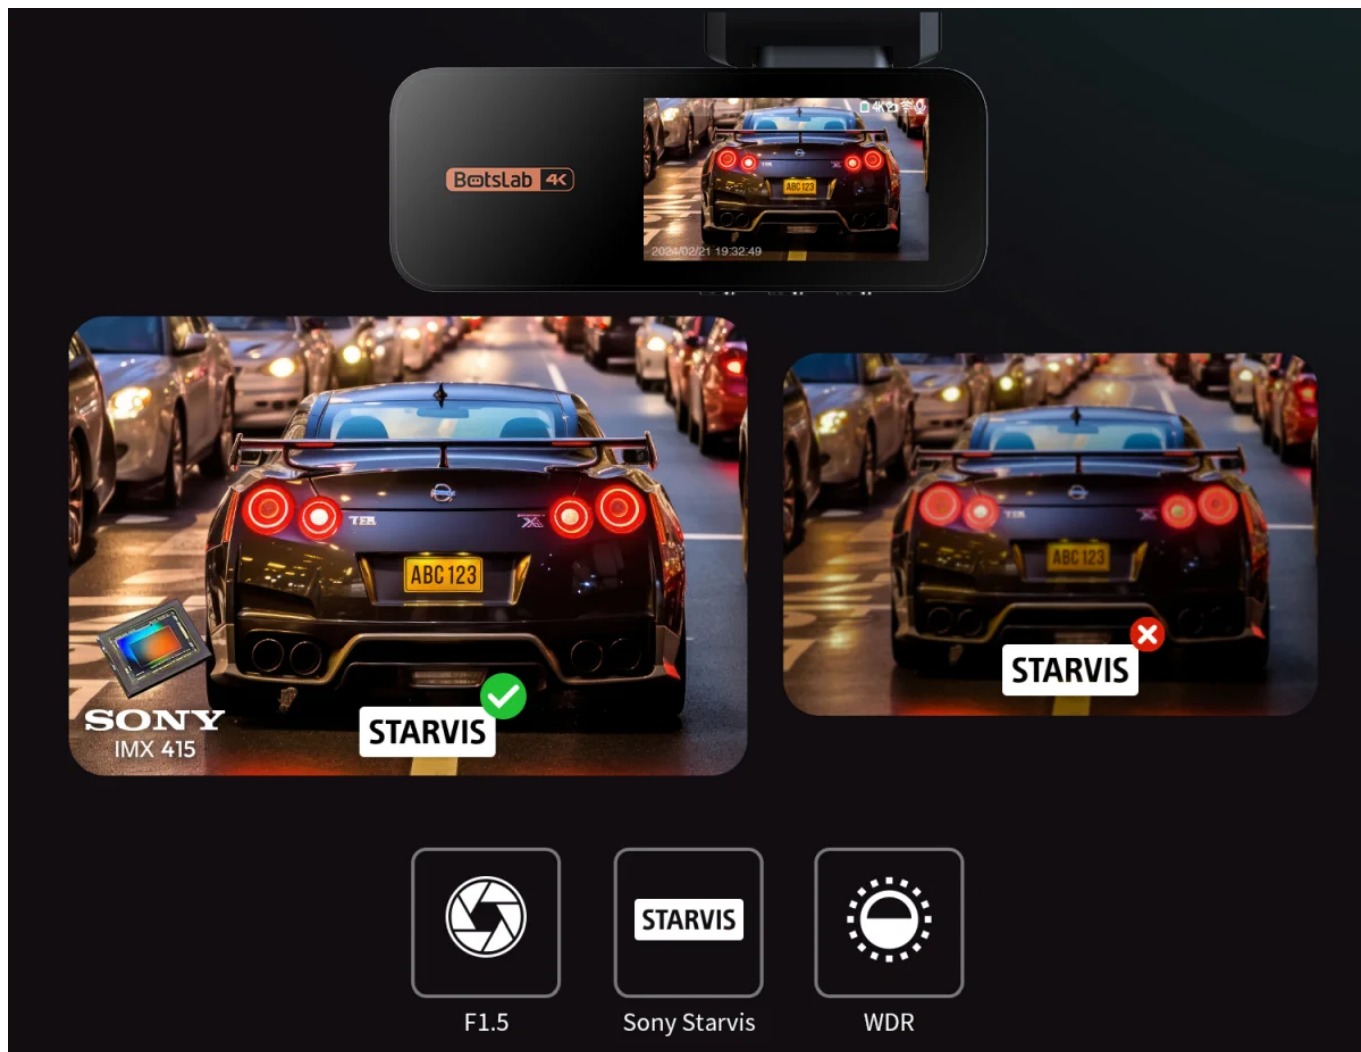

Botslab Dash Cam G980H: Your Reliable Shield on the Road - See Every Detail in True 4K!

Have you ever wondered how **many details escape your attention while driving**? Do you feel safe on the road, knowing that you have a reliable witness in every situation? **The Botslab Dash Cam G980H is a car camera** that will take your sense of security to the next level. With its crystal clear **4K video**, advanced **ADAS** features and reliability, you'll feel calmer and more confident on every trip.

Picture As Sharp As Ever - True 4K and Detail That Matters

In today's world, where video evidence is invaluable, the quality of the recording is crucial. The Botslab Dash Cam G980H features **a front camera that records in 4K resolution and a 2K QHD rear camera**. What does this mean for you? Whether it's a sunny day or a dark night, you can count on **exceptional sharpness and rich detail**. Thanks to **the Sony Starvis sensor**, the camera excels in low-light conditions, clearly capturing **license plates, road signs and other important details** that can be crucial in case of unforeseen incidents on the road. Don't let unclear recordings become a problem - with the Botslab G980H you can be sure that **every moment of your trip will be recorded** with unprecedented precision.

ADAS - Your Personal Driver Assistant, Taking Care of Your Safety

The Botslab Dash Cam G980H isn't just a camera - it's an Advanced Driver-Assistance Systems (**ADAS**) that actively takes care of your safety on the road. Imagine, the camera **warns you of a potential collision with a pedestrian, notifies you when the vehicle in front of you starts, monitors your distance from the vehicle ahead and alerts you if you leave your lane uncontrollably**. These intelligent functions operate in the background, constantly analyzing the traffic situation and reacting in a split second to prevent potential dangers. With ADAS, the Botslab G980H becomes your reliable partner to help you stay alert and safe in any situation, reducing stress and increasing confidence behind the wheel.

Pedestrian Collision Warning

Front Vehicle Starts Moving

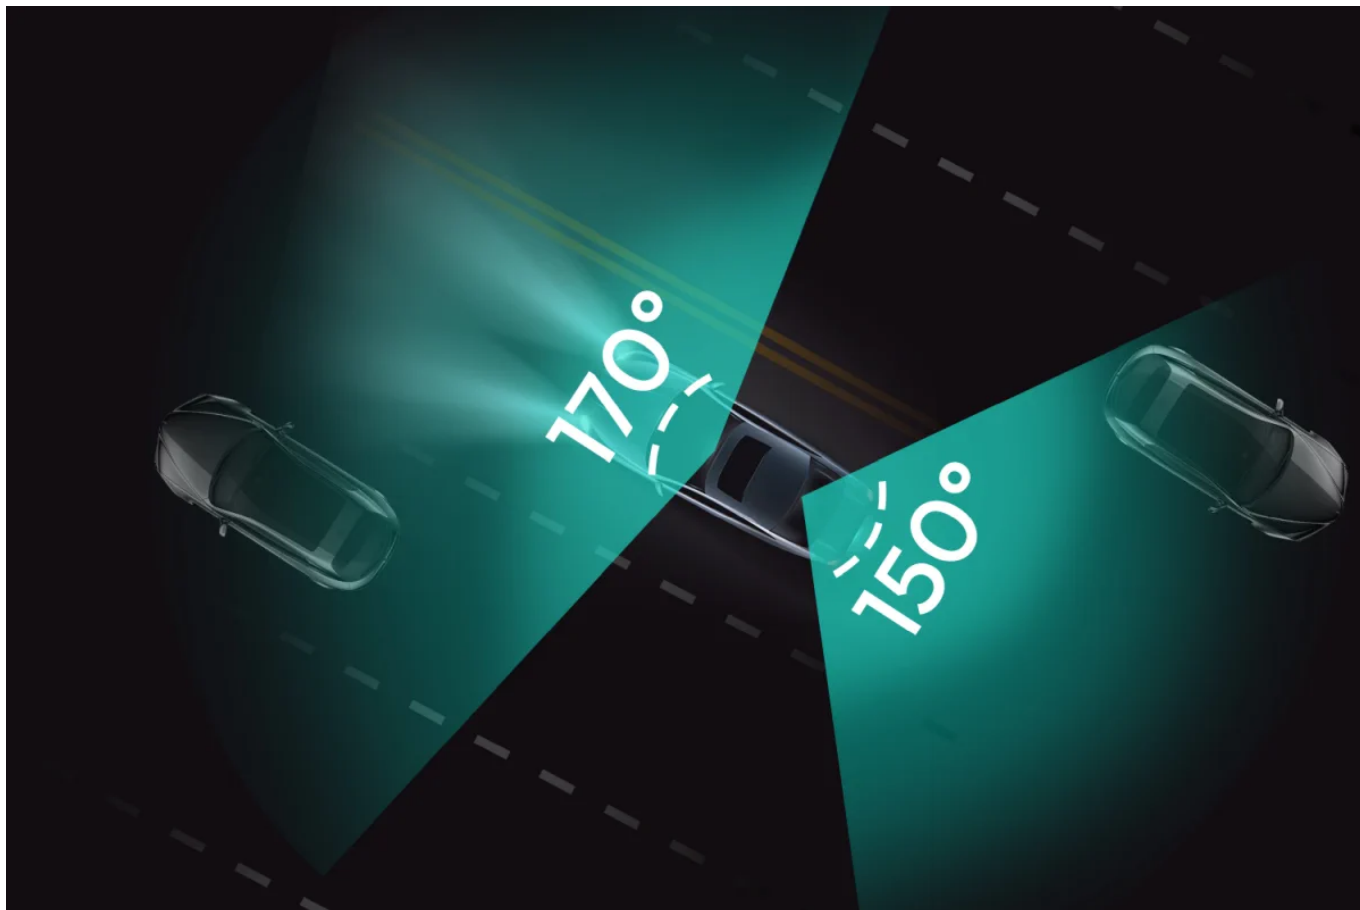

Headway Monitoring Warning

Lane Departure Warning

Wide Field of View - See More, React Faster

Worried about blind spots and limited field of view of traditional car cameras? With the Botslab Dash Cam G980H, you can forget about it. Equipped with **a 170° wide-angle lens at the front and 150° at the rear**, the camera captures the **maximum range of your vehicle's surroundings**. This means that no significant event will escape your attention - **from situations in adjacent lanes to pedestrians entering a crosswalk**. The wide field of view means not only greater safety, but also the certainty that, if necessary, **the recording will contain all the key information** necessary to clarify the situation on the road.

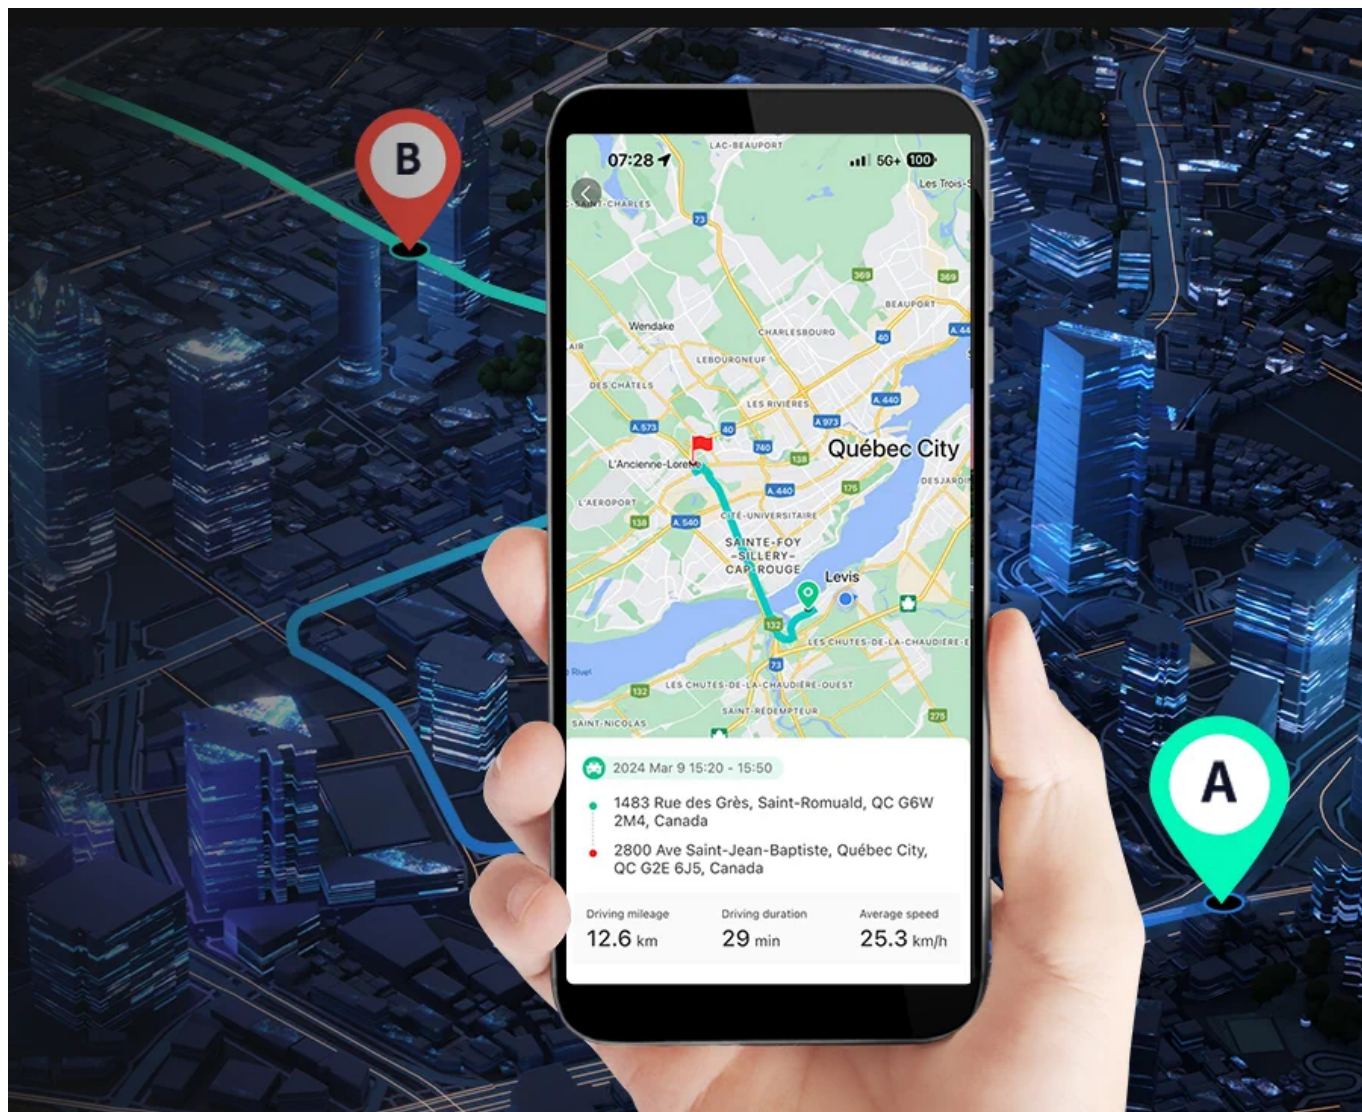

Reliability at Any Temperature - Durable Supercapacitor

Traditional car cameras with batteries often fail in extreme temperatures. The Botslab Dash Cam G980H is an innovative solution that uses a **durable supercapacitor**. Thanks to this, **the camera can withstand extreme temperatures** - both cold winters and hot summers. The supercapacitor guarantees **longer device life and greater reliability**, eliminating the risk of failures caused by overheating or battery discharge. What's more, in the event of a sudden power cut, **the supercapacitor allows the last recording to be safely saved**, protecting valuable data from loss.

GPS with Google Maps Integration - Save Routes and Have Full Control of Your Trip

The Botslab Dash Cam G980H is a camera that goes a step further, offering a **built-in GPS module with Google Maps integration**. As a result, **the camera accurately records your travel route, vehicle speed and geographic coordinates**. This data is not only useful for documenting your trip, but also **provides invaluable evidence in case of disputed situations on the road**. You can easily check your route, your speed at the time and the location of the incident, making it much easier to clarify the circumstances of an accident or collision.

Fast Data Transfer over Wi-Fi - Share Recordings Without Waiting

With **dual-band Wi-Fi (2.4GHz/5GHz)**, the Botslab Dash Cam G980H offers **lightning-fast data transfer**. You can **quickly and conveniently view, download and share recordings** on your smartphone or tablet without removing the memory card. **The 5GHz band provides a much faster transfer rate**, which is especially useful when transferring large 4K video files. Share your travels with loved ones, share video evidence with your insurer or the police - all quickly and seamlessly.

Easy Installation and Intuitive Operation - Camera Ready for Operation in a Few Moments

You don't need to be an expert to install and operate the Botslab Dash Cam G980H. The camera is designed for **maximum simplicity and convenience**. The static **mounting sticker** makes it **quick and easy to mount** the camera on the windshield **without leaving any marks**. The intuitive user interface and **Botslab mobile app** make setting up and operating the camera a breeze. Just a few moments out of the box, the camera is ready to record your travels and keep you safe. Everything you need is included, including a **64GB microSD card** so you can start using the camera right away.
