Full product description

2K surveillance camera with 360° pan and tilt

The **P4 pro** surveillance camera captures **2K HD** video day and night with 360° horizontal and 152° vertical views, minimizing blind spots to give you a wide view of every part of your home. Equipped with 3D noise reduction technology and 4x digital zoom, **the P4 pro camera** reduces unwanted image noise and allows you to zoom in and out to see all the details.

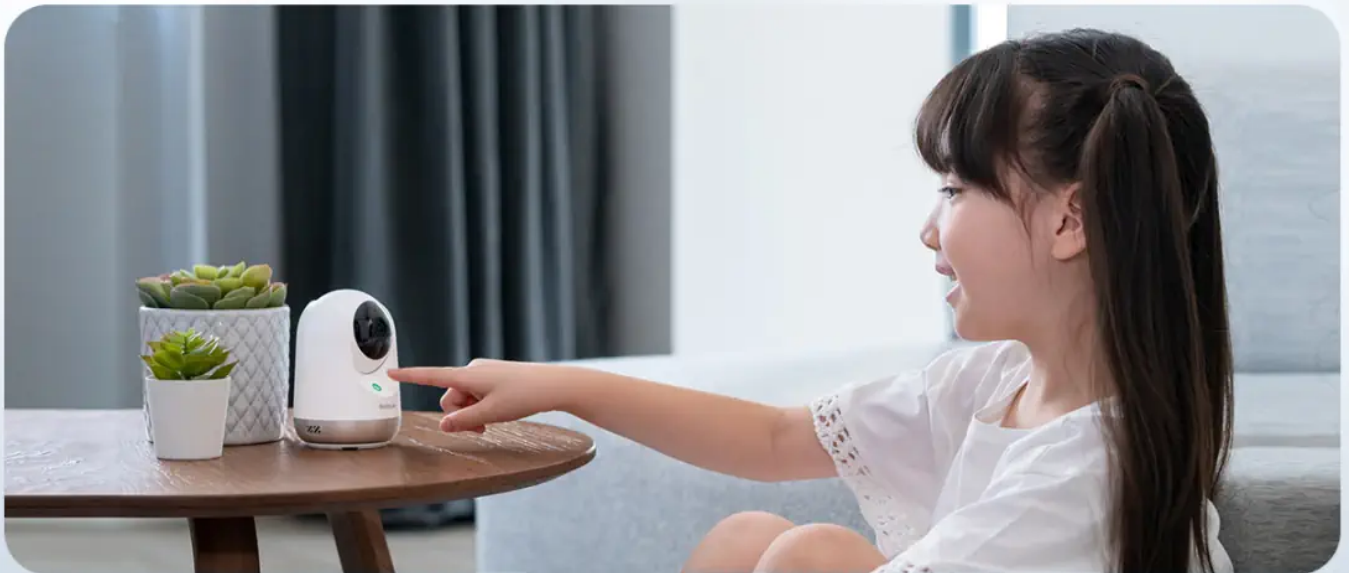

Privacy matters. So it's protected

Worried about privacy? You can always turn off the camera by simply swiping down or using taps in the **app** to send the camera to hide inside its body. All clips are encrypted with **Banking Level Security (Chacha20)** before storing locally or in the Amazon AWS cloud if you need more space. Protect your privacy at all times.

Press the button to make a real-time call

Featuring live view and two-way audio, **P4 pro** allows you to keep an eye on your kids playing in another room and chat with them in real time. Chat can be initiated either on your side via the app or on your kids' side by clicking on the camera.

No detail will be missed, even in the dark

With 8 built-in large **940nm IR LEDs**, the camera has **10m** of IR, giving you a clear view of your home even at night. The **P4 pro** supports low-light color night vision, which means the camera automatically balances the contrast in low-light conditions to provide accurate color images.

AI face detection and 360° Cruise mode

P4 pro has AI-based intelligent human and face detection function. When purchased above the basic subscription, it supports **AI face detection** with tags and footage selection.

Enable **360° cruise mode** from the app, and the camera will automatically move according to pre-set patrol paths so you are always aware of all the details.
