Full product description

cnMatrix Switch EX1010-P

Cambium Networks' next-generation switching platform offers a cloud-managed, high-performance, feature-rich enterprise-class switching platform Ethernet switching solution.

cnMatrix Switch EX1010-P is able to offer us **20 Gbps throughput**

, **8 PoE** enabled ports,

8 10/100/1000 ports

, **2 SFP Uplink** ports.

New solutions at your fingertips

Cambium Networks' next-generation switching platform offers a cloud-managed, high-performance, feature-rich switching platform for an enterprise-class Ethernet switching solution. The cnMatrix switch platform provides:

- Easy and simple, free cloud-based (or on-premises) management with **cnMaestro™** or **XMS* software**.
- Touchless switch deployment makes **installation easy**
- Policy-based automation **eliminates manual and time-consuming** configuration
- **Enhanced security** with automated device profiling and segmentation
- Policy-based automation eliminates **manual configuration** when adding, moving or changing network devices
- Unified **solution** for wired and wireless **access**

Cambium Networks™
