Full product description

Access Point XV2-2 Wi-Fi 6

The **XV2-2** software-defined enterprise access point continues the convergence of enterprise networks with an intelligent access point **managed by** the application-intelligent **Cambium Networks XMS or cnMaestro™** management system. Choose the management system that best fits your business and take advantage of the latest Cambium Networks technology.

Wi-Fi 6 for mobile devices and IoT

XV2-2 is a dual-radio Wi-Fi 6 access point designed for next-generation networks with edge services at an affordable price. Wi-Fi **6 technology** delivers **faster network speeds** and enables **more devices** to **connect at higher packet quality**. Wi-Fi 6 introduces a deterministic model to the radio frequency (RF) layer in which the access point controls client connections, including when to sleep, when to wake, and how to transmit and receive packets.

Advanced device intelligence

The XV2-2 is fully **compatible with existing Wi-Fi technology** and enables massive growth in low-power, low-bandwidth IoT devices, **increasing infrastructure intelligence** in every market.
