Full product description

Cambium CNPILOT Access Point XV3-8

The Cambium XV3-8 is **an enterprise-class** WiFi access point providing **up to 3466 Mbps** throughput. It operates in 2.4 and 5 GHz bands and supports **Wi-Fi 6/5 (802.11b/g/n/ac/ax)**, MU-MIMO 4x4, MU-OFDMA, TWT standards. Equipped with a dedicated 5 GHz radio module that performs proactive radio air monitoring and automatic switching to free WiFi channels, a BLE 4.1 module to integrate the access point into IoT infrastructure, a **5 Gbps RJ45 port** with PoE 802.3bt/at support and a 1 Gbps RJ45 port. Capable of supporting **up to 1024 clients**.

Main advantages and features

- High density Wi-Fi with software defined radios (SDR)
- Architecture with five radio modules for operation at the technology edge
- Total data rate 6 Gb/s
- Dedicated scanning sensor, dual band
- Application policy control
- EasyPass with integration with Microsoft Azure and Google G Suite
