Full product description

Cambium 60W 56V 5Gbe PoE power supply

Cambium Networks radios use PoE (Power over Ethernet) to provide power and data. This PoE power supply has an AC input and a data input, which then feeds a 56-volt power plus data (PoE) output to the radio. This PoE power supply meets stringent Level VI performance requirements and complies **with installation regulations in most locations around the world**. The unit is designed to be compact and easy to deploy, while providing reliability and high performance.
