Full product description

Meet Cambium ePMP Force 300 CSM ROW - an advanced wireless connectivity solution that combines high performance and reliability!

Featuring 5GHz 2x2 MIMO technology, this connectorized subscriber terminal offers exceptional throughput and stable connections even in the most demanding environments. Ideal for ISPs and businesses looking for reliable remote network management equipment.

High throughput and performance

The Cambium ePMP Force 300 CSM offers **bandwidth in excess of 500 Mbps** to support intensive applications and multiple users simultaneously. With support for modulation up to 256 QAM and channel widths from 20 MHz to 80 MHz, the device provides stable and fast connections in the 5 GHz band.

Advanced 5 GHz technology

Designed to operate in the 5 GHz band, the Cambium ePMP Force 300 CSM **is ideal for high-interference environments**. Its 802.11ac Wave2 technology enables point-to-point operation for high performance and reliable connections.

Advanced management and security features

Equipped with a Gigabit Ethernet RJ45 port, the device supports PoE for easy installation and management. In addition, support for 128-bit AES encryption and advanced network management features make **the Cambium ePMP Force 300 CSM a secure and efficient solution for any network**.
