Cambium Networks™

Manufacturer: CAMBIUM

Referention number: DNXGFNPNMRMNHQ

Full product description

Improving the functioning of the network

CnMatrix switches from Cambium Networks guarantee **high performance**, **corporate** class WLAN/LAN with free, easy-to-use cloud management for reduced errors and shorter network downtime.

10-port Gigabit Ethernet switch - cnMatrix EX2010-P Cambrium Networks

The **cnMatrix EX2010-P** network switch has **eight 10/100/1000 Mb/s** ports and two **2x SFP uplink ports**. Thanks to the rack type housing, the device is adapted to be mounted in a rack. The equipment enables **acceleration of the Ethernet network operation** for gigabit connections. Each of the 8 ports is powered by the Ethernet cable thanks to **PoE switch** technology, so there is no need for additional power cables.

Automatic machine segmentation and cleaning

Safety in the Cambium CnMatrix EX2010-P switch is ensured by automatic profiling and placing the device in a given network segment, devices connected to the building's network will not have access to the corporate logistics network. All dynamic configurations are automatically deleted when the device is disconnected.

Affordable Unified Wired/Wireless network managed in the cloud

Global communication systems significantly simplify network operation. This corporate, intelligent cloud management solution **increases** network resilience, efficiency and flexibility, and makes it easier to operate, providing operators with cost-effective wired/wireless connections. The entire end-to-end network is managed using the **free cnMaestro** management system from **Cambium Networks**.

Cambium Networks

Advantages for businesses

- Non-contact initial implementation for time and cost savings
- Significant improvement in safety thanks to automatic segmentation of devices
- Reduce network configuration errors by eliminating unreliable manual configuration
- Centralised management and common procedures within the network to reduce problem solving time
- Undisturbed local system operation even when the connection to the cloud is lost
- Reduce total system cost by using affordable cnMatrix switches managed by a FREE cnMaestro controller
